Trustees' Report.

To His Excellency, W. Y. Atkinson, Governor of Georgia:

DEAR SIR: Upon the provisions of the law creating this Board, we herewith submit our annual report, with accompanying reports of the heads of departments of the Georgia State Sanitarium, as read and adopted by the Board.

These reports, in detail, will show the management of the Institution for the fiscal year ending September 1, 1898.

We call your attention to the change in the name from the Georgia State Lunatic Asylum to that of the Georgia State Sanitarium, by authority of the Georgia Legislature, which took effect September 1, 1898.

The Board of Trustees organized by electing a President, Vice-President, and Secretary, and the following Committees were appointed:

Executive Committee,

Auditing Committee,

Committee on Buildings, Machinery and Repairs,

Committee on Farm and Outside Business,

Committee on Dairy,

Sanitary Committee,

Committee on Rules and By-Laws,

and the successful management of the Board is largely due to the faithful and untiring work of the various committees.

Under the rules, the Executive and Auditing Committees visit the Institution on the 20th of each month, and have the immediate control and oversight of the financial management in its remotest detail.

Your careful attention is especially called to the work of the Executive Committee. Most of the authority heretofore vested in the Superintendent and Steward of purchasing the supplies for support and maintenance, and the fixing of salaries of employes, now rests with this committee, who, together with the Superintendent and Steward, do this very important and responsible work.

And it is proper here to state that while this work imposes an arduous labor, and is quite a tax on the time and patience of the members of the committee, yet we feel assured that it is a move in the right direction.

During the year there has been no visitation to the Institution of any of the unexpected and fatal diseases that sometimes spread death and destruction in their wake.

On the contrary, the general health of the entire Institution has been remarkably good. The condition of the buildings and grounds are good, and speak well for the management.

Work on the negro building that suffered such loss by fire has been completed, and it is now a much better building than ever before, being furnished with fire walls separating the different departments, and in the remodeling very decided improvements otherwise were made—overhead metal ceilings and a general overhauling making the sanitary condition much better.

We call your attention to the fact that the insurance companies paid the State for the damage by fire on the buildings \$40,000. Your Board of Trustees let the contract for rebuilding for \$37,000, and in repairing saved an additional amount on condemned walls of \$1,000, making a total saved to the State of \$4,000, and now present a far better building than the one destroyed.

Another work demands your careful consideration.

The Dummy line had been delivering supplies from Milledgeville to the Sanitarium under a contract price of \$3,000.00. A demand was made for an increase to \$4,000.00, which the Board refused.

The matter was referred to the Executive Committee, with power to act. Mules and wagons were purchased sufficient to deliver the supplies, and negotiations at once entered into with the Central Railroad authorities to have them build a spur track from Old Midway, now Dorzan, on their road, to the Sanitarium. They have now about completed that work. This builds up competition in the delivery of supplies, and has already practically resulted in a free delivery at a saving to the State of \$3,000.00 annually.

The growth of the Institution with its annual increase of population necessitated the consumption of a large quantity of ice. As a matter of economy, as well as necessity, we have erected an ice plant, of a capacity of three tons daily, and will soon have constructed refrigerating rooms for cold storage of some six thousand cubic feet capacity. This will be of vast benefit to the Institution in the preservation of perishable articles of food.

We expect to be able next year, by economical management, to erect an electric plant to furnish lights for the buildings and grounds.

We feel assured that the use of electric lights will prove more economical and be far safer in every respect than the use of gas for light.

Road-working machinery has been purchased and will be used for putting the driveways in proper condition as early as possible. This work will be done by the stock and hands employed on the premises, when not otherwise engaged.

Your especial attention is called to that portion of the Superintendent's Report relative to Mr. William Schwarz, of Chatham county, and Mrs. Roxy Ann Long, of Bryan county, inmates of the Sanitarium, who are not now insane, yet cannot be discharged except by the Legislature.

It is with pleasure that we direct your attention to the fact that thirty-nine and one-half per cent. of the patients received in 1898 recovered. This fact should be fully known to those in whose families cases of acute insanity occur.

Our citizens should know and act upon the well established fact that hope of cure of insanity is in direct ratio with the length of time insanity has existed in the individual. After a person has been insane one year the hope of restoring him to sanity is small.

The people of Georgia should send their insane relatives to the Sanitarium immediately after the fact is established that they are insane.

An examination of the Report of the Steward discloses the fact that the per capita cost of maintenance during the year was less than that of 1897.

The detailed reports of the Steward and Treasurer will fully acquaint you with the financial status of the Institution, and we

respectfully refer you to these reports for any desired information relative to expenditures of appropriations for maintenance.

In considering these reports you will bear in mind that the preparations made for the inmates during the winter months make the expenses heavier during the latter months of the year, October, November and December. The purchase of winter clothing, coverings for beds, etc., these unavoidable outlays will absorb any apparent surplus that might appear to you in looking over the finance report.

You will notice from the annual reports that the population of the Institution is gradually increasing every year, rather in proportion as the population of the State grows, and it would occur to you that we should ask for an increased appropriation.

Taking into consideration the stringency of the times, we hope by practical economy in the administration of the affairs of the Sanitarium to efficiently provide and care for these unfortunate people on the same amount appropriated for last year's support. Therefore, your Board would respectfully ask that the appropriations for 1899 be \$290,000, and 1900 be for \$290,000.

Your Board of Trustees are pleased to report that the officials of the Institution have faithfully and efficiently discharged the duties of their respective positions during the year just closed, and we take this opportunity to publicly acknowledge our indebtedness to these officers for valuable assistance in the successful management of the Sanitarium.

In closing, we beg to tender to your Excellency and to the General Assembly of Georgia our heartfelt thanks for the generous maintenance of the Sanitarium during the year 1898.

Respectfully submitted,

E. E. DIXON, M. D., *President.*

T. J. CARLING, *Vice-President.*

Report of Superintendent Powell.

STATE LUNATIC ASYLUM,
MILLEDGEVILLE, GA., Sept. 1st, 1898.

To the Honorable Board of Trustees, State Lunatic Asylum:

GENTLEMEN:—In obedience to the requirements of the law and rules of the Institution, I have the honor herewith to submit for your consideration the following report of this Institution, beginning September 1st, 1897, and ending September 1st, 1898, together with the reports of the Steward, Treasurer and other officers, giving a full and detailed statement of its operations in its every department, and showing the amount of provisions, bedding, drugs, and indeed, everything purchased, from whom, price paid, and aggregate cost. Also the movement of its population, with such suggestions as I may think advisable or beneficial in conducting the affairs of the Institution.

On September 1st, 1897, there were white patients on hand, 1,515, and colored 653, making a total of 2,168. There have been received since 432 whites and 227 colored, making a total reception of 659.

There have been discharged, removed, eloped, and died during the year 501, leaving on hand September 1st, 1898, 2,326, of whom there are 43 whites and 9 colored on furlough, not discharged.

The average number of patients under treatment during the year was 2,247, while the total number receiving treatment was 2,827.

It will be seen that the average number receiving treatment was 162 more than last year. We have 158 more patients on hand than at the close of last year.

The following tables will give in detail the movement of both white and colored population:

STATEMENT—WHITE.

In relation to the number of white patients during the past year, or from September 1st, 1897, to September 1st, 1898,

There were patients on hand September 1st, 1897	1,515.
White Male Lunatics.....	596
White Male Epileptics	79
White Male Idiots.....	30—705
White Female Lunatics	714
White Female Epileptics	69
White Female Idiots.....	27—810—1,515

There have been received during the year :

White Males.....	222
White Females.....	210
	432

Total number of whites under treatment.....	1,947
---	-------

Of whom there have been

Discharged restored.....	175

REMARKS.

Diagnosis.

Terminal History.

PATIENTS TO BE DISCHARGED BY THE GENERAL ASSEMBLY.

I desire to call your attention to two patients that are now well. These patients were sent here by order of Court, and can only be discharged by the General Assembly, and I respectfully ask that you present this before the General Assembly when they convene.

The names of the patients are as follows : Mr. Wm. Schwarz, sent from Chatham county, August 13th, 1895, and Mrs. Roxie Ann Long, sent from Bryan county, May 3d, 1897.

HEALTH.

The general health of the Institution has been very good for the past year. We have been exempt from all contagious, infectious and communicable diseases, save mumps and tuberculosis. The mumps, by proper precaution, was confined to one building. Tuberculosis has been, as you know, alarming prevalent among the colored female insane, and its tendency was to a rapid and fatal decline. It is gratifying to note, however, by reference to the mortality table and the report of the Pathologist, that there has been a decided decrease in the mortality from tuberculosis in its various forms during the year. We believe that we are warranted in assuring that the decrease is to a great extent due

to the persistent efforts to eradicate this disease by prompt isolation so soon as discovered, and other prompt hygienic measures.

By reference to the mortality tables you will see the causes of death of those who have died during the year. The ratio of death to the number treated during the year is eight per cent.

RECOVERIES.

The per cent. of recoveries, based upon the number received during the year, is thirty-nine and a half. Hopeful cases, as a general thing, are the recent cases, and the recoveries of each year depend largely, or almost entirely, upon the number of acute cases received. There are, of course, a large number of cases of chronic mania, senile dementia, and epileptics of long standing, received each year, and for these there is very little hope for mental improvement.

CONVICT INSANE.

On this subject I shall say but little, as I have repeatedly called the attention of the General Assembly, through your honorable body, to the convict insane and a certain class of defectives that are being received in this Institution, but which should be provided for elsewhere. By reference to my last annual report, page 18, you will find I give in detail what I regard as just and humane reasons why separate provision should be made for this class of the afflicted; hence, I will give in this report only a few reasons as to the flagrant injustice to the ordinary insane and society in forcing our patients, whose lives have been free from crime, to associate, on account of their affliction, with this class.

It is almost impossible to prevent their escape in an ordinary hospital for the insane; therefore, the tendency is to increase feigning of insanity. They are a standing menace to the welfare of the Institution in every particular, and, as a general thing, they are disorganizers among the other patients, and some of them are dangerous, creating a constant apprehension of homicides.

As I stated in my last report, for the defective class with depraved tendencies, a reformatory, where their moral faculties in the formative stage of life could be properly developed and educated, and where they could be engaged in some useful work, is

the only proper provision, in my judgment, that will justify us in the hope of improving or eradicating the depraved tendencies. For the convict insane a small hospital might be established in connection with the Penitentiary for their care and treatment.

PATHOLOGICAL TREATMENT.

It is with deep regret that I have to report that our efficient and faithful pathologist, Dr. Oertel, has tendered his resignation, to take effect October 1st, to accept a position as Professor of Pathology in the Medical Department of the State University. This Institution has sustained a great loss by his resignation. He has labored with untiring energy, and has developed the pathological department of this Institution. Indeed, he has taken a lively, active interest in everything pertaining to the welfare of the patients and the good of the Institution. As you doubtless know, he was an untiring worker. It gives me great pleasure to record in this report that a great advance has been made in the pathological department of this Institution, for which I am profoundly grateful, and which reflects great credit on Dr. Oertel and Dr. Mobley. It is an advancement in psychiatry that we cannot afford to neglect. If we expect or hope to continue the advancement of scientific work in our Sanitarium we must have a neuro-pathologist. It is the only course that will justify the Alienist and Neurologist in looking forward with any anticipation or hope for the solution of many of our problems, and I trust your honorable body will give me the authority to select a thoroughly well equipped neuro-pathologist to fill the vacancy caused by the resignation of Dr. Oertel, he to have charge of a certain number of patients, as Dr. Oertel had, being the pathologist and assistant physician also. This selection to meet with your endorsement.

By reference to the Report of the Pathological Department you will see some of the important and interesting work done during the year. While for six months the work of the pathologist and his assistant, Dr. Mobley, was very much interfered with by the fearfully overcrowded condition of the building for the colored insane, due to the burning of the old part of the building. This overcrowded condition demanded so much of their time that they could not accomplish as much in the way of

laboratory work as they would have done under ordinary circumstances. They were frequently engaged in laboratory work until eleven and twelve o'clock at night, and even with this interference the work done is thoroughly convincing to those who can properly appreciate it that a laboratory is a necessary adjunct to a well equipped hospital for the insane.

TRAINING SCHOOL AND INFIRMARY WARDS.

The lectures of the training school for white female nurses have continued regularly twice a week during the year, by our efficient Superintendent of Nurses, save for fifteen days' vacation. The training school has evidently been of great value in improving the service of the attendants in giving more intelligent aid to the physicians, and better care of the patients and wards in every particular. Every female nurse is required to enter the training school. This requirement is made before they are employed. Some of the nurses during the year have had the advantage of clinical instruction, and practical experience in surgical cases, etc.

No material change has been made in our infirmary wards since our last annual report. They still furnish the best possible care for the feeble and sick, both day and night, being in charge of faithful trained nurses.

The lectures to colored female nurses were suspended on account of the overcrowded condition of that department, and the great demand made upon the time of the nurses in looking after the patients.

SURGERY.

It is gratifying to acknowledge that the Institution has very wisely inaugurated that division of scientific work so necessary in all the hospitals for the insane throughout the country ; that is, the proper provision for antiseptic and capital surgery.

This advance in the treatment of certain classes of insanity, especially among the female, is being strongly advocated by some of the best Institutions in the land ; and the time is not far distant when the establishment of this department will be obtained in all hospitals of any magnitude.

The work is just now in its incipiency with us, and for this reason it will be impossible to render an extensive tabulated statement indicating the great good which this new field of labor is intended to subserve.

In repairing the burned portion of the building for the colored insane, a modern up-to-date operating room has been erected. This structure consists of a large well ventilated room, with magnificent skylight, for operating purposes. Adjacent to this, under the same roof, are two perfectly equipped rooms for the reception of post-operative cases. The most recent surgical appliances and modern aseptic apparatus have been procured, and major as well as minor operations can now be performed according to the latest principles of antiseptic surgery.

The Institution is deeply indebted to Dr. W. H. Doughty, Jr., of Augusta, Ga., for his kind and efficient service in some of our most serious surgical cases. Through his skillful aid we have had performed four hysterectomies and one ovariotomy. The patients have all made speedy recoveries, and present fair evidence of mental improvement.

The following is a tabulation of some of the most important operations performed during the year just ended. As a sufficient time has not yet elapsed to definitely determine the effect upon the mind, the termination applies to surgery only:

SEX.	MENTAL AND PHYSICAL DISEASE.	SURGICAL TREATMENT	TERMINATION.
Female.	Chronic Mania. Fibroid Uterus.	Hysterectomy.	Recovery.
Female.	Acute Mania. Fibroid Uterus.	Hysterectomy.	Recovery.
Female.	Hystero-Epilepsy. Ovaritis.	Ovariotomy.	Recovery.
Female.	Epileptic Insanity. Ovaritis.	Hysterectomy.	Recovery.
Female.	Hystero-Epilepsy. Retro-Versio-Uteri. (Adhesions.)	Hysterectomy.	Recovery.
Male.	Acute Mania. Organic Stricture.	Perineal Section.	Recovery.
Male.	Chronic Mania. Syphilitic Necrosis. (Frontal Bone.)	Curettage. (Pack- ing.)	Unfavorable.
Female.	Chronic Mania. Carcinoma Mammariae.	Extirpation.	Recovery.
Male.	Congenital Imbecile. Prolapsus Rectum and Colon.	Laparotomy. (Re- placement.)	Death. (Shock.)
Male.	Chronic Mania. Depressed Fracture.	Elevation.	Recovery.
Female.	Chronic Mania. Traumatic Ventral Hernia	Laparotomy and Replacement.	Death. (Septic Peritonitis.)
Female.	Chronic Mania. Subpectorad Abscess.	Incision. (Drain- age.)	Recovery.
Female.	Acute Mania. Peri-Rectal Abscess.	Incision. (Drain- age.)	Recovery.
Female.	Chronic Mania. Chronic Glaucoma.	Enucleation.	Recovery.
Female.	Chronic Mania. Fracture. (Lower Third Tibia.)	Plaster Paris. (Dressing.)	Recovery.
Female.	Acute Mania. Cervical Abscess.	Incision. (Drain- age.)	Recovery.
Female.	Senile Dementia. Luxation Humerus. (Shoulder.)	Reduction. (Bandage.)	Recovery.

SEX.	MENTAL AND PHYSICAL DISEASES	SURGICAL TREATMENT	TERMINATION.
Female.	Chronic Mania. Syphilitic Necrosis. (Clavicle.)	Curettage. (Pack- ing.)	Recovery.
Female.	Chronic Mania. Chronic Glaucoma.	Enucleation.	Recovery.
Female.	Chronic Mania. Diffuse Suppurative. (Parotitis.)	Incision. (Drain- age.)	Recovery.

THE BUILDING FOR THE NEGRO INSANE.

On the 9th of November last a fire occurred under the roof of the old part of the building used for the negro female patients at 15 minutes after 12 M. A tinner at the time was working on the roof, and it is thought that the fire originated from his fire pot. The fire alarm was promptly given, and in a few minutes the Asylum fire brigade was at the building, and was organized with commendable zeal. Of course our first effort was to get the patients out of that portion of the building in which the fire originated and put them in a place of safety. While we had many that were not able to walk, and had to be carried out in the arms of the nurses and other help, their removal was effected with as much order as could be expected under the circumstances, and I am profoundly grateful to be able to state that no casualty or escape of patients occurred, although one or two papers made a different statement.

The Milledgeville fire brigade, also the Macon fire brigade, came as promptly as possible to our assistance, and it affords us pleasure to again express to them our high appreciation and gratitude for their valuable and untiring efforts in checking the fire, which lasted until late in the night.

This fire was a thorough test of the efficiency of our water-works, which saved us from complete loss of the building. Our water supply was ample, and we pumped a little over 1,000,000 gallons during the progress of the fire, and the pressure was strong enough to force the water to any point desired.

The fire gutted the greater part of the building occupied by the females, and burned off the roof of the building occupied by males.

The fire walls put in between the old portion and the annexes on both male and female sides proved very effective, the fire being stopped within sixty feet of these walls.

As soon as practicable after the fire, the Board of Trustees, together with the insurance men, convened, and the adjustment was \$40,000. Proper advertisements for bids were immediately made, and the contract was awarded to J. W. McMillan for repairing the damage done, he being the lowest bidder. The work was done under specifications made by our Engineer, Capt. T. H. DeSaussure.

The building now is in many respects much better than it was before the fire. The original building was constructed without any fire walls. In rebuilding, it is divided into eleven sections by fire walls from the basement running three feet through the roof, and provided with fire doors at all openings. The floors of all hallways, day rooms and dormitories have been laid with selected rift or quarter sawed pine. The steam heating in the female wing has been remodeled also. New and larger flues have been built, and new radiators. The old building was neither plastered nor ceiled on the two lower floors. Both of these now have stamped steel ceiling with asphalt paper under it. There was used in this work 30,612 square feet of the ceiling. Besides the above mentioned improvements there has been added a small structure of brick in the rear for surgical purposes. This building is 28x36 feet, and is one story high. It contains one instrument room, one sterilizing room, two bed rooms and one operating room. The operating room has a skylight 8x12 feet over the operating table. The building is lighted by gas, and is heated by steam, and is supplied with hot and cold water, sinks, etc.

In the female wing is a room 10x21 feet, in which primary examinations of patients are made. It contains an operating table, fixtures for sterilization of instruments used in genito-urinary investigations, and a movable argand burner for ophthalmoscopical and laryngoscopical examinations. The three windows are provided with black roller curtains, so that the room may be instantly darkened.

The brick work outside of the entire part of the old portion of the building, 72,000 square feet, will have three coats of paint.

While this was included in the contract for repairing the damage done by fire, it has not yet been finished, it being deemed advisable not to put the oil paint on the newly laid brick work.

The entire cost of these improvements in the negro department, including the erection and equipment of the surgical building, has been \$3,000 less than the sum awarded by the insurance adjusters.

The building was rebuilt in sections as far as possible. The first section on the female wing was completed on May 16, and the first female patients were received on May 19. The wing for the males was first used on May 24, and the building was formally accepted on June 16.

Much credit is due Mr. McMillan, the contractor, for the great interest he manifested in giving us completed sections as soon as possible to relieve us of our greatly overcrowded condition in the annexes, as well as of many of the jails throughout the State which were making constant and urgent demands upon us for the admission of patients confined therein. I am sorry to say that some of the county authorities made unjust complaints on account of our not being able to receive or relieve their jails of the insane, when all possible speed was being made for the completion of the building by sections. This was probably due, however, to their lack of knowledge of the true condition of the Institution. The annexes to the building for the colored insane were simply packed, the capacity of the annexes being 270, and we had crowded in that space 650 patients. You can readily appreciate the anxiety in regard to casualties and epidemic diseases under such circumstances. I am glad to state, however, that we had neither.

EMPLOYMENT AND AMUSEMENTS.

A large per cent. of our male patients, whose condition and willingness would justify it, have been employed in some way about the Institution in its various departments.

The females have been, as usual, assisting about the wards, dining rooms, etc., and in addition they do all the sewing and repairing for the Institution.

The colored female patients have been principally employed in the laundries, and in sewing, and giving some assistance about the wards.

Dr. Whitaker has kept up the amusements regularly with the usual careful oversight until the mumps occurred in one of the buildings for white males, when all gatherings were stopped to prevent the spread of the disease. While it continued for some months in this building, this precaution prevented its spread.

IMPROVEMENTS AND REPAIRS.

Many important improvements and repairs have been made during the past twelve months. In the early part of the year there was a new telephnoe exchange put in which connected every department of the Institution with the administrative building.

By reference to the report of our efficient Engineer you will see a detailed statement of all repairs and improvements made during the past year.

ENGINEER.

For a full and detailed account of repairs, improvements, etc., I refer you to the Engineer's report.

FINANCES AND ESTIMATED AMOUNT FOR SUPPORT AND MAINTENANCE FOR 1899 AND 1900.

The report of our competent and faithful Steward will show that the per capita per diem for the past year has been 32-46.100. He also suggests that for support and maintenance for the next two years the appropriation be the same as last year, \$290,000 each year.

On account of the fire, which destroyed a large portion of the building for the colored insane, we did not receive any colored patients for six months, and were quarantined against several counties for some time on account of small-pox. But for this, the average number of patients would have been much larger, and the expenses for support and maintenance of the Institution would have been several thousand dollars more.

ASSISTANT STEWARD.

By reference to the report of the Assistant Steward you will see a full and complete account of the results of the garden, dairies, and the amount of pork raised, which was 51,382 pounds, and it should be remembered that these hogs were fed entirely on the waste from the various kitchens and tables of the Institution, except for a short time before killing, when they were put up and fed on corn.

STOREKEEPER.

By reference to the report of the Storekeeper you will find a full account of the conduct and management of that department.

MATRON.

The report of our efficient Matron will give a full and complete account of the work done in her department.

APOTHECARY.

The report of the Apothecary gives an itemized statement of the work done in that department, the number of prescriptions filled, and the amount of drugs and instruments on hand.

LIBRARIAN.

It gives me great pleasure to acknowledge the contributions of books, papers and periodicals, etc., from the many friends of the Institution, which have contributed so much to the welfare and pleasure of the patients.

By reference to the Librarian's report you will see a list of these generous contributions, and all who contributed, as far as it has been possible to ascertain.

RELIGIOUS SERVICES.

Religious services have been conducted regularly on Thursday and Sunday afternoons during the year by our efficient Chaplain, Rev. Wiley J. Page, save during the epidemic of mumps, when services were discontinued for some months to prevent the spread of the disease.

The attendance upon services has generally been large and conduct good. The Chaplain has responded to all calls to bury the dead.

CONCLUSION.

In conclusion, it is gratifying to state that the officers, attendants and employes, as a general thing, have discharged their respective duties with commendable zeal and fidelity, for which I feel deeply grateful. And to your honorable Board I am thankful for all the aid and co-operation you have given me in the discharge of my responsible duties.

Tusting in the future to the guidance of a wise and merciful Providence, I am,

Very respectfully,

T. O. POWELL,

Superintendent.

Report of Pathologist.

GEORGIA STATE SANITARIUM,
SEPTEMBER 31, 1898.

Dr. T. O. Powell, Superintendent.

SIR: I have the honor to herewith submit my report as Pathologist for the year ending this date.

The work of the Pathological Department has been seriously curtailed by the burning of the negro building, on account of the increased amount of time and attention required at the hands of your pathologist and his assistant in the supervision of the negro female department during the long reign of inconvenience pending the completion of the new building and the confusion incident to taking possession of its wards.

Sixty-two (62) necropies have been held, and the gross results are set forth in the tabulated statement following.

Microscopical examinations of the kidneys in forty-seven cases show changes to a pathological degree in 66.66 per cent., as against 73.83 per cent. in seventy-six cases reported last year, and 70.69 per cent. in the total 133 cases thus compared.

The usual clinical work of the laboratory has been carried on, and a large number of primary examinations of urine and sputum have been made and filed with the mental and physical examinations to which the patients are subjected upon entrance.

A comparison of the relative number of cases of tuberculosis in its various forms among the *colored females* during the past five years yields the following results:

1893-1894.

Total number of patients treated	334
Total number of deaths from tuberculosis	15
Per cent. of deaths from tuberculosis, based on the total population.....	4.5
Total number of deaths from all causes.....	34
Per cent. of deaths from tuberculosis.....	44.4

1894-1895.

Total number of patients treated	370
Total number of deaths from tuberculosis	27
Per cent. of deaths from tuberculosis, based on the total population.....	7.3
Total number of deaths from all causes.....	52
Per cent. of deaths from tuberculosis.....	51.9

1895-1896.

Total number of patients treated	398
Total number of deaths from tuberculosis	19
Per cent. of deaths from tuberculosis, based on the total population.....	4.8
Total number of deaths from all causes.....	42
Per cent. of deaths from tuberculosis.....	45.0

1896-1897.

Total number of patients treated	452
Total number of deaths from tuberculosis	24
Per cent. of deaths from tuberculosis, based on the total population.....	5.3
Total number of deaths from all causes.....	87
Per cent. of deaths from tuberculosis.....	27.4

1897-1898.

Total number of patients treated	430
Total number of deaths from tuberculosis	19
Per cent. of deaths from tuberculosis, based on the total population.....	4.4
Total number of deaths from all causes.....	49
Per cent. of deaths from tuberculosis.....	41.3

It will be noticed that there is this year a lower relative number of deaths from this dread scourge, due partly, let us hope, to the fact that our efforts at reducing its ravages through prompt detection and isolation of these cases have met with success.

The microscope has been of inestimable value in detecting cases of pulmonary tuberculosis in the earlier stages of the disease, and I would urge a still more systematic and frequent inspection of sputum in future in all cases where the slightest suspicion of tuberculosis of the lungs exists.

Perhaps the most important work so far carried on in the laboratory is the forming of a collection of negro brains for the purpose of future study and elaboration of statistical data which cannot fail to interest the scientific world at large, and it is hoped add somewhat to the sum of human knowledge.

The tabulated statement appended gives such information as can at this time be presented relative to the seventy-five (75) specimens thus far preserved.

These are too few to venture to draw conclusions from. The report is intended simply as a preliminary one to draw attention to the fact that work along this line is being done. It is with regret that your Pathologist, in leaving this for another field of labor, is compelled to lay down this work. He sincerely trusts that his successor may carry it on to completion.

Nowhere in the world does such an opportunity for collecting brains from insane negroes present, and if the pathologist were to devote his entire time and energy to the prosecution of the work begun, he could not spend them in a more interesting or valuable research.

Table Showing Results of Investigation of Negro Brains.

CASE NO.	RACE.	SEX.	AGE.	WEIGHT IN KILOS.	HEIGHT IN C. M.	R. HEM	L. HEM	CERE- BEL.	BRAIN STEM.	MENTAL DISEASE.	DURATION.	CAUSE OF DEATH.

* Mulatto. † Octaroon. ‡ Atrophy. § Bullet wound.

The hemispheres were stripped of the membranes before being weighed.

The left hemisphere of case No. 63 was atrophied.

The right hemisphere of case No. 8 presented a large area of degeneration, due to old gun shot wound.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys.		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.	
								Left	Right	Grms	Grms
85	C	F		Acute mania	7 weeks	General Miliary. Tuberculosis. Fatty Liver.	9			170	LEFT KIDNEY.—Slight thickening of capsule. The glomeruli are swollen and have lost many of their endothelial cells. Capsules of Bowman often contain granular detritus in quantity. General cloudy swelling of epithelial cells of the convoluted tubules with loss of striation and in some places breaking down of the cells at their outer border. RIGHT KIDNEY.—Condition as in left exaggerated. Bodies supposed to be protozoa are found in clumps in many places.
86	W	F	61	Epileptic dementia	32 years	Inner table of skull very much thickened. Cerebral atrophy. Atheroma of cerebral arteries. Interstitial nephritis.	.7	118	98		Capsule thickened and a general and considerable increase of connective tissue. Some of Bowman's capsules are hypertrophied, others are shrunken and filled with granular detritus. There is atrophy of the tubular epithelium and the lumen of the tubes is filled with a serous fluid, and some of them contain casts. Blood vessels are thickened and there is passive congestion.

87	C	F	35	Epileptic dementia	?	Chronic encephalitis; tubercular pleurisy; cystic kidneys.	2	150	110	Slight thickening of capsules of Bowman, with proliferation of thin endothelium and detritus about the glomeruli. Some cloudy swelling of cells of convoluted tubes and breaking down of their outer border.
88	C	M	7	Acute mania	8 months	Thickened inner table of skull with bony exostoses in frontal region.	6	135	125	A number of glomeruli are atrophied and hyaline. Cells of tubules granular and lumen of tubes contain a serofibrinous detritus.
89	C	F	60	Epilepsy	2 years	Pachy meningitis externa ossificans. Slight atheroma mitral valve and aorta. Cystic kidneys; fibroid of uterus; interstitial nephritis.	3	120	100	Capsule thickened and round cell infiltration beneath it. Round cell infiltration in small areas scattered throughout the parenchyma. Marked sclerosis of the vessels and great increase of connective tissue in the pyramids. Some of the glomeruli are fibroid or hyaline. Capsules of Bowman are more or less thickened, and many contain proliferated cells. Cloudy swelling of cells of convoluted tubules which contain a granular detritus. Several hyaline casts <i>in situ</i> .
90	C	M	60	Chronic mania	4 years	Pachy meningitis externa ossificans cerebral atrophy. Atheroma cerebral vessels. Abscess of lung. Small tumor left kidney.	2	187	141	LEFT KIDNEY.—Section of tumor shows it to be a <i>tubular-papilloma</i> . In the region of tumor the parenchyma is cirrhotic to a marked degree. Other portions show general increase of connective tissue, glomeruli are swollen and hyperemic, the tubular epithelium cloudy and granular.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.
								Left	Right	
90 Continued	C	M	60	Chronic mania	4 years	Pachy menengitis externa ossificano cerebral atrophy; atheroma cerebral vessels. Abscess of lung. Small tumor left kidney.	2	Grms 187	Grms 141	RIGHT KIDNEY.-Capsule slightly thickened, general increase of connective tissue, most marked in pyramids. Capsules of Bowman thickened; glomeruli atrophied and many show loss of endothelium. Cells of convoluted tubes are in an advanced stage of cloudy swelling, and have in many cases lost their nuclei and partly broken down. In many small areas they are totally destroyed. Endarteritis of larger vessels.
91	C	F	31	Chronic mania	4 years	Miliary tuberculosis of brain; general miliary tuberculosis.	3	165	135	Slight general increase of connective tissue. Capsules of Bowman are all more or less thickened. Cells of convoluted tubules in good condition. <i>Not pathological.</i>

92	C	F	80	Chronic mania	?	Cerebral atrophy, atherosoma basal arteries. Calcareous aorto. Cystic kidneys; cirrhotic kidneys.	4	85	92	Capsule thickened; general increase of connective tissue and some round cell infiltration. Capsules of Bowman show marked thickening, and a few contain proliferated endothelium. The glomeruli are atrophied, many hyaline or fibrous. Epithelial cells of tubules are in fair condition, but in places are granular and broken down. Some detritus in the tubes and numerous hyaline casts <i>in situ</i> .
93	C	M	30	Chronic mania	3 years	Pulmonary tuberculosis.	12	140	110	General increase of connective tissue most marked in pyramids. Capsules of Bowman are thickened and glomeruli atrophied to half their normal size. Tubular epithelium is swollen in many places and often without nuclei. A few hyaline casts <i>in situ</i> in ascending tubes of Henli. Pronounced endarteritis.
94	C	M	30	Sub-acute mania	15 months	Pulmonary tuberculosis.	5	175	140	LEFT KIDNEY.—Hyaline degeneration of a few glomeruli. Tubules are filled with a sero-fibrinous detritus. Some hyaline casts <i>in situ</i> . Condition not pathological.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.
								Left	Right	
94 Continued	C	M	30	Sub-acute mania	15 months	Pulmonary tuberculosis.	5	175	140	RIGHT KIDNEY.—Connective tissue increase throughout. Small areas of round cell infiltration. Capsules of Bowman are all more or less thickened. Some glomeruli are hyaline and atrophied. Cells of tubules are in fair condition. A few casts <i>in situ</i> . Changes to a pathological degree.
95	C	M	75	Senile dementia	?	Basal arteries calcareous. Atheroma of mitral valve. Cystic kidneys.	5	98	107	Capsule thickened, slight increase of connective tissue in cortex, very great in pyramids. Cells of convoluted tubules are fatty, often poorly defined and in some places disintegrated down to a level with the nuclei. There are areas where the nuclei are shrunken to half their normal size and stain a deep black. Other cells have lost their nuclei. The tubes contain a fibrinous detritus. A few hyaline casts are noted. Passive congestion.
96	C	M	?	Epilepsy	?	Tubercular pleurisy and peritonitis. Gangrenous appendix.				Partial autopsy.

97	C	M	24	Epilepsy	7 years	Pulmonary abscess.	12	120	120	Slight, cloudy swelling of cells of convoluted tubes, some loss of nuclei and a small amount of detritus in the tubes. Slight endarteritis. Not pathological.
98	C	M	65	Chronic mania	5 years	Cerebral apoplexy. Basil vessels calcareous. Calcareous degeneration mitral valve and aorta.	6	110	110	General increase of connective tissue. A few dense areas of round cell infiltration without necrosis. Marked endarteritis. Changes are not to a pathological degree.
99	C	F	65	Senile dementia	4 years	Atheroma mitral valve and aorta.	16	75	75	A general, and in certain areas, a pronounced increase of connective tissue. Bowman's capsules are thickened and contracted, the glomeruli in many instances are entirely fibroid. The cells of the convoluted tubules show marked disintegration. In many places there remains only a homogeneous detritus, in others there is still some continuity of the structure, cells being intact. The changes are probably largely <i>post-mortem</i> , but the large number of hyaline casts <i>in situ</i> in the tubes of Henli indicates extensive changes prior to death. Marked endarteritis.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.
								Left	Right	
100	C	M	23	Epilepsy	4 years	Pyo-pneumonothorax.	3	120	120	Slight increase of connective tissue. Capsules of Bowman somewhat thickened, and a few hyaline tufts are seen. The cells are in good condition. Changes are not to a pathological degree.
101	C	M	47	Epilepsy	15 years	Thickened inner table of skull. Pulmonary oedema. Interstitial nephritis.	3	145	142	Marked connective tissue increase. Capsules of Bowman show the greatest changes, many being thickened into a broad, fibrous band. The tufts are in all stages of fibroid degeneration, some being entirely transformed into a fibroid and hyaline mass. They are all more or less atrophied and their capsules filled with detritus. The cells show less change. Some have lost their nuclei and a few are entirely broken down. All of the tubes contain a sero-fibrinous detritus. The blood vessels are much thickened.

102	C	F	30	Acute mania	2 months	General miliary tuberculosis. Parenchymatous nephritis.	16	205	177	The connective tissue is universally increased, this being most marked in Bowman's capsules, which all exhibit more or less thickening. The glomeruli are swollen and have lost many of their cells. The cells of the convoluted tubules are cloudy, more or less disintegrated, the nuclei are either very faint or have altogether disappeared. The changes are partly post-mortem, but there was evidently a parenchymatous nephritis.
103	C	F	80	Senile dementia	?	Pachy meningitis interna ossificans. Miliary tuberculosis. Calcareous aorta. Cystic kidneys.	3	120	80	LEFT KIDNEY.—Slight increase of connective tissue. Detritus in capsules of Bowman, and a few hyaline casts <i>in situ</i> . RIGHT KIDNEY.—Great connective tissue increase, capsules of Bowman much thickened, contain a detritus and in some cases a few endothelial cells. The cells of the convoluted tubules are in a state of cloudy swelling, some have lost their nuclei and are broken down, and several casts <i>in situ</i> are noted. A large miliary tubercle is also observed.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.
								Left	Right	
104	C	M	30	Acute mania	1 year	Cerebral congestion.	10	140	135	Slight general increase of connective tissue. Marked thickening of capsules of Bowman. A number of glomeruli are atrophied and hyaline. Nearly all of the glomeruli show extensive loss of endothelium, which cells in some cases lie free within the capsule. Several instances of proliferation of cells of the capsule of Bowman are noted. Pronounced cloudy swelling of cells of convoluted tubules, in some cases loss of nuclei and fragmentation of the cells. Slight endarteritis.
105	W	M	70	Chronic mania	17 years	Pachy meningitis, cerebral oedema, basil arteries, calcareous, dilatation left lateral ventricle				Partial autopsy.
106	C	F	26	Chronic mania	2 years	Pigmentation of pia. Tubercular bronchopneumonia.	4	125	120	Capsules of Bowman slightly thickened, slight cloudy swelling of tubular epithelium and sero-fibrinous detritus in tubes. Changes are <i>not</i> to a pathological degree.

107	C	M	30	Chronic mania	5 years	Pulmonary tuberculosis. Septic peritonitis.	3	110	100	A few small areas of cirrhosis are scattered throughout the cortex. The capsules of Bowman are somewhat thickened and many contain a small amount of granular detritus. A sero-fibrinous detritus occupies many of the tubes.
108	C	F	28	Acute mania	8 months	Pachy meningitis. Hepatic abscesses. Pulmonary tuberculosis.	16	128	120	There are several small areas of sclerosis and the capsules of Bowman are all hypertrophied, some to a marked degree. Many glomeruli are atrophied, others are swollen and show desquamation of their cells and some are hyaline. The cells of the convoluted tubules show cloudy swelling and thin lumen is filled with detritus. Some cells have lost their nuclei and are broken down.
109	W	F	65	Chronic mania	30 years	Pachy meningitis. Pericarditis pleuritis. Enterocolitis.	8	140	130	Small cirrhotic areas in cortex. Several of Bowman's capsules are thickened and contain proliferated cells. Many glomeruli are atrophied and several are hyaline. In some areas there is cloudy swelling and fragmentation of the cells of the convoluted tubes and many tubes contain granular detritus while others exhibit hyaline casts <i>in situ</i> .

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.
								Left	Right	
110	C	M	23	Idiot		Cyst of floor of left ventricle. Miliary tuberculosis.	6			Slight connective tissue increase. Passive congestion. Not pathological.
111	W	M	58	Congenital defect		Calvaria 14 mm thick. Pachy meningitis.	8	62	67	No deviation from the normal observed.
112	C	F	26	Chronic mania	3 years	Pulmonary tuberculosis.	2	110	90	Capsule thickened, miliary tuberculosis, thickening of Bowman's capsules, hyaline degeneration of many tufts. Cloudy swelling of tubular epithelium. The tubes contain a great many casts, epithelial, granular and hyaline.
113	C	F	25	Chronic mania	3 years	Obliterative pericarditis. Pulmonary tuberculosis.	5	130	110	Many of the capsules of Bowman contain a sero-fibrinous detritus. Cells of convoluted tubules are granular and poorly defined, and the lumen of the tubes contains a granular detritus. There are quite a number of casts <i>in situ</i> and a few small areas of round cell infiltration are observed.

114	C	F	40	Acute mania	?	Pachy meningitis externa ossificans. Atheromatous and calcareous cerebral vessels. Cerebral softening. Left ovarian cyst. Cystic and cirrhotic kidneys. Bilateral double ureta.	4	142	100	Large sclerotic areas are scattered throughout the cortex. In these areas there is great destruction of glomeruli and tubes. The tufts are atrophied and often degenerated into small fibrous balls. The tubules are shrunken, the cells crowded together obliterating the lumen. Numerous casts <i>in situ</i> . A typical cirrhotic kidney.
115	C	F	12	Idiot		Chronic pleurisy. Chronic parenchymatous nephritis.	8	120	110	The glomeruli are large and swollen and their capsules contain desquamated cells and granular detritus. Cells of convoluted tubules show cloudy swelling, loss of nuclei and fragmentation. The lumen of the tubes is filled with granular detritus. There are a few small areas of round cell infiltration.
116	W	F	68	Terminal dementia	7 years	Pachy meningitis; interna hemorrhagica. Cirrhotic kidneys.	7	55	75	General increase of connective tissue. A few sclerotic areas in cortex and general sclerosis of pyramids. The tufts show considerable loss of endothelium. Cells of convoluted tubules swollen, granular, poorly outlined, loss of nuclei and fragmentation is frequent. Tubes filled with sero-fibrinous detritus and many casts <i>in situ</i> are noted.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.
								Left	Right	
								Grms	Grms	
117	C	M	47	Acute mania	9 months	Pachy meningitis interna hemorrhagica, aneurism of aorta. Cystic kidneys. Chronic interstitial nephritis.	5	165	130	General increase of connective tissue, large areas of dense connective tissue and fibroid degeneration of tufts and tubules and round cell infiltration. A large cyst occupies one side of section from left kidney. Cloudy swelling of tubular epithelium. Many hyaline casts <i>in situ</i> .
118	C	M	35	Chronic mania	6 years	Pachy meningitis interna chronica. Diffuse miliary tuberculosis. Chronic parenchymatous nephritis.	9	210	180	Small areas of dense sclerosis. Several glomeruli fibroid or hyaline. All of Bowman's capsules are slightly thickened and contain a large amount of detritus. Glomeruli show marked loss of endothelium and atrophy. Some are almost entirely broken down. Cloudy swelling of cells of convoluted tubules, loss of nuclei and fragmentation. Tubes filled with detritus.
119	C	F	60	Acute mania	10 months	Atheroma of cerebral arteries. Tubercular pericarditis and pleuritis. Cystic kidneys.	14	122		LEFT KIDNEY.—General connective tissue increase. Bowman's capsules thickened, glomeruli atrophied, a few hyaline. Cells of convoluted tubules exhibit cloudy swelling and fragmentation. Large numbers of hyaline casts <i>in situ</i> .

119 Continued	C	F	60	Acute mania	10 months	Atheroma of cerebral arteries. Tubercular pericarditis and pleuritis. Cystic kidneys.	14	122		RIGHT KIDNEY.—Condition similar to left but greater destruction of elements. Extensive areas of sclerosis with corresponding atrophy of the tubules and glomeruli.
120	C	F	28	Chronic mania	5 years	General tuberculosis.	15	90	70	Changes are chiefly in cells of convoluted tubules, which are cloudy and swollen and show an extensive loss of nuclei and fragmentation of the protoplasm. A few large hyaline casts are in the collecting tubules. Changes largely post mortem.
121	W	M	38	Acute mania	4 months	Chronic endocarditis.	12	112	110	Slight post mortem changes.
122	W	M	13	Epilepsy	8 years	Cerebral cirrhosis.	10	60	58	Nothing abnormal noted.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.
								Left	Right	
123	C	F	18	Puerperal mania	13 months	Passive congestion of all organs.	5			Just beneath the capsule is a zone of new connective tissue rich in capillaries and about four times the diameter of capsule. It merges gradually the cortical structure and within its lower limits the tubules are atrophied and contracted. Distinct cloudy swelling of cells of convoluted tubules with atrophy of nuclei. Some cells broken down and lumen of tubes filled with detritus. Congestion is intense.
124	C	M	39	General paresis	2 years	Pachy meningitis interna chronica cerebral atrophy. Chronic endocarditis, atheroma of aorta. Pulmonary tuberculosis.	7	185	165	There is more or less desquamation of the endothelium of the glomeruli and their capillaries are engorged with blood. The tubules of the cortex contain a sero-fibrinous detritus. Changes are not to a pathological degree.

125	C	M	60	Acute mania	8 months	Old traumatic fracture right temporo-occipital region with bone projecting into cortex, and corresponding area of degeneration. Abscess of lung. Cystic kidneys.	2	150	125	Zone of fibrous tissue beneath the capsule. Intense passive congestion. Changes are not to pathological degree.
126	C	F	35	Not insane		Acute miliary tuberculosis.				
127	W	M	17	Idiot		Lobar pneumonia right lung.	6	90	85	Capsule much thickened, glomeruli slightly atrophied. Not pathological.
128	C	F	43	Chronic mania	3 years	Cerebral oedema and atrophy. Obliterative pericarditis.	14	120	125	Slight post mortem changes. Not pathological.
129	C	M	70	General paresis	5 years	Pachy meningitis interna. Atheroma middle cerebral arteries and aorta.	14	105	100	A few small areas of sclerosis. Marked post mortem changes. Not pathological.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.
								Left	Right	
130	W	M	89	Chronic mania	55 years	Pachy meningitis externa ossificans. Cerebral atrophy. Chronic interstitial nephritis. Cystic kidneys.	14	180	155	Several areas dense sclerosis and others of round cell infiltration. Connective tissue of pyramids increased. Many glomeruli are fibroid, others swollen and their endothelium desquamated. Cells of tubules show changes more or less post mortem. Eudarteritis and a few casts <i>in situ</i> .
131	C	F	30	Acute mania	10 months	Mitral atheroma and aortic stenosis. Chronic parenchymatous nephritis.	13	140	135	Changes in glomeruli are marked, swollen, capillaries dilated and filled with blood and desquamation of their cells is extensive and general. Bowman's capsule contain a granular detritus. Cells of convoluted tubules are cloudy, swollen and many are without nuclei and partly disintegrated. One large wedge shaped area is thickly infiltrated with round cells. The glomeruli (twenty in number) are fibroid, and those tubules which are intact are filled with fatty casts.

132	C	F	35	Sub-acute mania	15 months	Pachy meningitis interna hemorrhagica. Hyperplasia of spleen.	5	110	112	Glomeruli atrophied, dense sclerosis in pyramids. Cells of convoluted tubules small and lumen filled with detritus. A great many hyaline casts <i>in situ</i> .
133	C	F	38	Epileptic dementia	4 years	Cerebral atrophy.	5	150	120	Capsule slightly thickened. There are several areas of round cell infiltration and general increase of connective tissue. Cells of convoluted tubules swollen and their edges poorly defined. The lumen of the tubes is filled with granular detritus. Endarteritis. A number of hyaline casts <i>in situ</i> .
134	C	M	60	Acute mania	8 months	Several small pneumonic areas.	2	135	125	Capsule thickened. Slight general increase of connective tissue. Sero-fibrinous detritus in tubes. Changes not pathological.
135	C	F	21	Epilepsy		Dermoid cyst, right ovary.	4	80	90	Slight increase of connective tissue. Not pathological.
136	C	F	35	Acute mania	8 months	Cyst right ovary.	2	120	120	Capsule thickened, cells in good condition. Sero-fibrinous detritus in tubes. Not pathological.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

Case No.	Race	Sex	Age	Mental Disease	Duration	GROSS ANATOMICAL LESIONS.	Hours after death of section	Weight of Kidneys		RESULTS OF MICROSCOPICAL EXAMINATION OF KIDNEYS.	
								Left Grms 120	Right Grms 110		
137	C	F				Lobar pneumonia, (double.)	5			Cells in good condition. A few hyaline casts <i>in situ</i> . Condition not pathological.	
138	C	M	29	Chronic mania	16 years	General miliary tuberculosis, and tubercular nephritis.	13	145	130	Capsule considerably thickened and fibrous bands extend from it downward into the cortex. A number of glomeruli are fibrous, others are swollen and show loss of endothelium. Several small miliary tubercles are seen. Cells of convoluted tubules show cloudy swelling and in some places are broken down to the level of the nuclei. Numerous hyaline casts in convoluted and collecting tubules.	
139	C	M	21	Epilepsy	2 years	Obliterative pleurisy.	7	105	90	Capsule thickened and structures lying just beneath it are atrophied, interspersed with dilated capillaries and areas of round cell infiltration. Bowman's capsules slightly thickened and there are a few fibroid glomeruli. Tuffts are swollen, thin capillaries dilated and many cells desquamated. Tubular epithelium in good condition.	

140	W	F	57	Chronic mania	20 years	Inner table frontal region much thickened. Atheroma basil vessels. General tuberculosi. Cystic kidneys. Chronic interstitial nephritis.	9	115	100	Capsule thickened, numerous large areas of dense sclerosis and round cell infiltration. A number of glomeruli are fibroid, others have thickened capsules and are much atrophied. Tubular epithelium is swollen and granular. Large numbers of hyaline casts <i>in situ</i> .
141	W	F	75	Chronic mania	17 years	Large cyst right ovary. Chronic endocarditis and atheroma of aorta. Fatty heart.	15	130	130	A few glomeruli are hyaline, capsules of Bowman slightly thickened. Post mortem changes in epithelium. Not pathological.
142	C	F	32	Terminal dementia	3 years	Chronic nephritis. Acute entero colitis.	2	110	100	LEFT KIDNEY.—Glomeruli are atrophied to half their normal size. In some areas considerable increase of connective tissue and the cells of the convoluted tubules are cloudy, swollen and often fatty. Many tubes contain large hyaline casts. RIGHT KIDNEY.—Like left, with large areas of dense round cell infiltration and numberless casts <i>in situ</i> . Endarteritis.

Table Showing Results of Post-Mortem Examinations from September 1, 1897, to September 1, 1898.

143	C	M	75	Sub-acute mania	18 months	Cerebral atrophy.	12			140	105	Capsule thickened, numerous small areas of round cell infiltration. Obliterative endarteritis. Post mortem changes in the tubular epithelium prevents an accurate knowledge of their condition.
144	W	F	74	Senile dementia		Chronic interstitial nephritis. Carcinoma uteri.	5	60	100			Cirrhotic changes are marked. There are large areas of dense connective tissue, round cell infiltration and atrophy of the tubular epithelium and glomeruli with numerous casts <i>in situ</i> .
145	C	M	45	Acute mania		Cerebral oedema.	3	110	80			
146	C	F	43	Choreaic insanity	5 years	Nitral and tricuspid insufficiency and general miliary tuberculosis.	9	145	100			

SYNOPSIS OF TABLE.

Pachy-menengitis externa ossificans, in seven cases.
Pachy-menengitis interna hemorrhagica in three cases.
Cerebral cirrhosis in one case.
Atheroma of basil arteries in ten cases.
Pericarditis in three cases.
Cardiac lesions in nine cases.
Aneurism of aorta in one case.
Atheroma of aorta in nine cases.
Pyo-pneumo-thorax in one case.
Pulmonary abscess in three cases.
Lobar pneumonia in three cases.
Pulmonary tuberculosis in ten cases.
General miliary tuberculosis in eleven cases.
Cystic degeneration of both kidneys in eleven cases.
Ovarian cyst in three cases.
Ovarian dermoid cyst in one case.
Carcinoma of uterus in one case.
Enterocolitis in two cases.
Hepatic abscess in one case.

I wish to thank the Superintendent for his uniform kindness and encouragement in my work.

I am also much indebted to my assistant, Dr. J. M. Mobley, for his faithful and efficient services.

Respectfully,

T. E. OERTEL, *Pathologist.*

Report of Steward.

GEORGIA STATE SANITARIUM,
Milledgeville, Ga., August 31st, 1898.

DR. T. O. POWELL, *Superintendent*:

DEAR SIR.—I have the honor to transmit through you to our Board of Trustees, this, my report as Steward, from September 1st, 1897, to September 1st, 1898.

Abstract "A" shows the balance brought forward from last fiscal year, the amount drawn from the State Treasurer for support and maintenance of the Institution, together with a classified statement of the disbursements; also the balance on hand to be carried forward to the next year.

Abstract "B" shows in detail the expenditures on account of subsistence.

Abstract "C" shows in detail the expenditures on account of clothing.

Abstract "D" shows in detail the expenditures on account of fuel and transportation.

Abstract "E" shows salaries paid to officers.

Abstract "F" shows wages paid to employees.

Abstract "G" shows in detail the expenditures on account of incidental expenses.

Abstract "H" shows in detail the expenditures on account of medical supplies.

Abstract "I" shows in detail the expenditures on account of contingencies.

Abstract "J" shows in detail the expenditures on account of stationery and postage.

Abstract "K" shows in detail the expenditures on account of special appropriation for fire walls and cistern, together with the balance on hand carried forward to next year.

Abstract "L" shows in detail the expenditures on account of repairing building for colored insane, together with the balance on hand carried forward to next year.

Abstract "M" shows the requisitions for support and maintenance of the Institution, drawn from the State Treasurer in their regular order.

Abstract "N" shows the average number of patients from 1873 to 1898, both included, together with the per capita cost per diem and per annum.

Abstract "O" shows the cost of maintaining one patient for one year, month, week, and day.

Abstract "P" shows the expenditures in detail of the balance of the special appropriation for duplicate water main.

Our Storekeeper, Mr. W. H. Hunter, reports stock on hand \$8,937.55.

Our Apothecary, Dr. A. G. North, reports stock on hand \$1,237.25.

Our per capita is \$32.46.

By reference to the report of Mr. G. W. Hollinshead, Assistant Steward, you will find results from garden, dairies, hogs, etc.

Since the appropriation was made for the Institution for 1898, the building for colored insane was partially destroyed by fire in November, 1897, thus depriving us of the use of a large part of the building for several months, which prevented our taking colored patients until the building was repaired, and for this reason our expenses are several thousand dollars less than they otherwise would have been.

I would suggest that an appropriation of \$290,000 for support and maintenance of the Sanitarium be made for the years 1899 and 1900.

With renewed expressions of gratitude for confidence reposed in me by our honorable Board of Trustees, as well as by yourself, I am yours,

Very respectfully,

LUCIUS J. LAMAR,
Steward.

ABSTRACT "A."

Statement of Steward, Georgia State Sanitarium, showing the balance brought forward from last fiscal year, and all money received; also a classified statement of disbursements from September 1, 1897, to September 1, 1898:

1897.	CASH.	Dr.
Sept. 1.	To cash on hand.....	\$ 2,471 45
1898.		
Aug. 31.	To cash drawn from State Treasurer.....	272,333 30
		<u>\$274,804 75</u>

Report of Assistant Steward.

GEORGIA STATE SANITARIUM,
Near Milledgeville, Ga., Sept. 1st. 1898.

Mr. L. J. Lamar, Steward:

DEAR SIR : I herewith hand you my report as Assistant Steward, for the year beginning September 1st, 1897, and ending August 31st, 1898, of the old and new Dairys, Garden and Park. Also statement of Stock, Wagons, etc., on hand September 1st, 1898.

Our Fall crops are looking well. The prospect is that we will make the largest sweet potato crop we have ever made. The rutabagas are also looking fine.

Our Dairys have not been the success, in my opinion, that they would have been had we not adopted or tried the plan of milking the cows without breeding them.

Very respectfully,

GEORGE W. HOLLINSHEAD,
Assistant Steward.

Report of Engineer.

GEORGIA STATE SANITARIUM,
Milledgeville, September 1, 1898.

Dr. T. O. Powell, Superintendent.

DEAR SIR: I have the honor to submit herewith my annual report of the workings of this department from September 1st, 1897, to September 1st, 1898.

Respectfully,

T. H. DESAUXURE, *Engineer.*

IMPROVEMENTS.

STEEL CEILING.

Two wards in the "detached building" have been ceiled with stamped steel ceiling. The steel is underlaid with asphalt paper, and has been given two coats of paint.

The Amusement Hall, also, has been ceiled with ornamental steel ceiling.

DETACHED BUILDINGS.

Both the East and West "Detached Buildings" have been painted outside, and in each of them there have been put two fire-walls, dividing each building into three fire sections.

The West building has had rift flooring put down on two wards, and much new plastering done. There have, also, been made in this building seventeen strong rooms for violent patients, the walls being plastered with cement mortar, and the doors battened; the windows are provided with strong wire guards. There has also been put up a porch at the west building, 18 by 26 feet, extending to both stories. The sides of this porch is of wire-screen work, making two very cool and pleasant open air rooms.

STEAM HEATING.

The remodeling of the steam heating apparatus under the main female building, mention of which was made in the report for 1897, has been continued this year; much of the work has been completed, and it will be finished in ample time for the coming session's work.

Two radiators have been put in the photographic department of the Laboratory.

PORCH AT MAIL BUILDING.

There has been a wooden porch, twelve by twenty feet, with tin roof, built at the north door of the sick ward.

FIRE DOORS IN CONVALESCENT BUILDINGS.

Both convalescent buildings have had fire-walls put through them, each building being now divided into four fire sections.

TELEPHONES.

There has been put in a telephone exchange with forty-seven instruments, and a switchboard in the main centre building.

ICE WORKS.

A contract has been made with a construction company for the erection of a three ton ice making plant. The work has practically been completed, and at this date the contractors are making a test of the machinery.

CARPENTERS' WORK.

Besides doing a large amount of "ordinary repair" about the Institution during the year, the carpenters have made the following articles :

102 Shuck mops.	52 Yard benches.
28 Sash.	12 Door frames.
2 Transom sash.	7 Panel doors.
3 sets sheltring.	32 Rooms floored.
1 Platform at warehouse.	19 Tables—small.
1 Lattice partition at warehouse.	13 tables—large.
1 Wooden partition center building.	2 cases for telephone.
	48 Wire-guards.

- | | |
|--|-----------------------------------|
| 1 Tool box for shop. | 7 Stepladders. |
| 6 Window frames. | 5 Rooms ceiled overhead. |
| 8 Long ladders. | 200 curtain strips. |
| 12 Commodes. | 15 Baker paddles. |
| 10 Lattice doors. | 53 Hoe handles. |
| 2 Water troughs. | 1 Well curb. |
| 6 Tables for sinks. | 218 Coffins. |
| 12 Voucher boxes. | 37 Boxes for shipping corpses |
| 2 Cart frames. | 1 Yard pavilion, 40x80, tin roof. |
| 5 Wagon frames. | 1 Safe. |
| 1 Mantelpiece. | 2 Large medicine cases. |
| 2 Small medicine cases. | 1 Cupboard. |
| Tops on 3 bread carts. | 1 Awning - storehouse. |
| 1 Bread mixer at Bakery. | 1 Instrument case. |
| 1 Flour box at Bakery. | 1 Wardrobe. |
| 1 Chest for clothes. | |
| 1 Work-table with drawers and closets for Surgical Room. | |

Report of Matron.

GEORGIA STATE SANITARIUM,
Milledgeville, September 1st, 1898.

Dr. T. O. Powell, Superintendent :

Permit me to submit the enclosed as my report for the year ending September 1st, 1898. I would add that repairing has been done for the Institution, and all scraps and remnants have been put to a good use, and have been properly accounted for through the store-keeper's office.

All of which is respectfully submitted,

MRS. J. M. DARNELL, *Matron.*

Report of Apothecary.

SEPTEMBER 1st, 1898.

To Dr. T. O. Powell, Superintendent :

DEAR SIR : I have the honor herewith to submit my report of Apothecary department, from September 1st, 1897, to September 1st, 1898 :

Amount of drugs purchased from September 1st, 1897, to September 1st, 1898	\$4,764 66
Amount of drugs sold officers and employees with de- ductions from checks were made, and for which the Apothecary is entitled to credit.....	213 50
Amount of drugs and fixtures on hand Sept. 1st, 1898	1,237 25
Number of prescriptions filled from September 1, 1897, to September 1, 1898.....	16,373

Very respectfully,

A. G. NORTH, *Apothecary.*

Report of Librarian.

GEORGIA STATE SANITARIUM,
September 1st, 1898.

Dr. T. O. Powell, Superintendent:

DEAR SIR: I have received the following newspapers for the year ending September 1st, 1898:

- 1 copy Macon Telegraph, daily.
- 1 copy Journal, Atlanta, daily.
- 1 copy Morning News, Savannah, by publishers, daily.
- 2 copies Enquirer and Sun, Columbus, by publishers, daily.
- 1 copy Times-Recorder, Americus, by publishers, daily.
- 1 copy Herald, Albany, by publishers, daily.
- 1 copy of Chronicle, Augusta, by publishers, daily.
- 1 copy Commercial-Courier, Rome, by publishers, daily.
- 3 copies Union & Recorder, by publishers, weekly.
- 1 copy Southern Christian Advocate, by publishers, weekly.
- 1 copy Southern Presbyterian, by publishers, weekly.
- 1 copy Valdosta Times, by publishers, weekly.
- 1 copy Covington Star, by publishers, weekly.
- 1 copy Franklin News & Banner, by publishers, weekly.
- 1 copy Calhoun Times, by publishers, weekly.
- 1 copy Eatonton Messenger, by publishers, weekly.
- 3 copies Sparta Ishmaelite, by publishers, weekly.
- 3 copies Constitution, Atlanta, by publishers, weekly.
- 3 copies of Semi-Weekly Banner, by publishers, semi-weekly.
- 1 copy Blackshear Times, by publishers, weekly.
- 1 copy Plow-Boy, by publishers, weekly.
- 1 copy National, by publishers, weekly.
- 1 copy Columbus Sentinel, by publishers, weekly.
- 1 copy Southern Farmer, by publishers, weekly.
- 1 package Sunday School Times, J. F. Simmons, Kirkwood.
- 1 sack periodicals and papers, C. G. Wilson.
- 2 bundles newspapers, at different times, Joane Fowler.
- 1 large box periodicals and papers, P. J. Cline.

Below you will please find my report for the year ending September 1st, 1898.

Number of volumes received to Sept. 1st, 1898.....	10,967
Hon. C. L. Bartletti, M. C., volumes.....	11
C. C. Niles	3
Mrs. R. A. Trippe	18
Number of volumes received in all.....	10,999

Respectfully,

ROBT. A. TRIPPE, *Librarian.*

Report of Chaplain.

GEORGIA STATE SANITARIUM,
Milledgeville, October 6th, 1898.

Dr. T. O. Powell, Superintendent :

DEAR SIR : Religious services have been conducted regularly on Sunday and Thursday afternoons during the year ; the Lord's Supper has been administered monthly to several persons ; the dead have been buried.

The services have been largely attended and deep interest manifested: Judging from these facts and the many kind expressions of appreciation, they have been a source of joy and real spiritual benefit to the inmates.

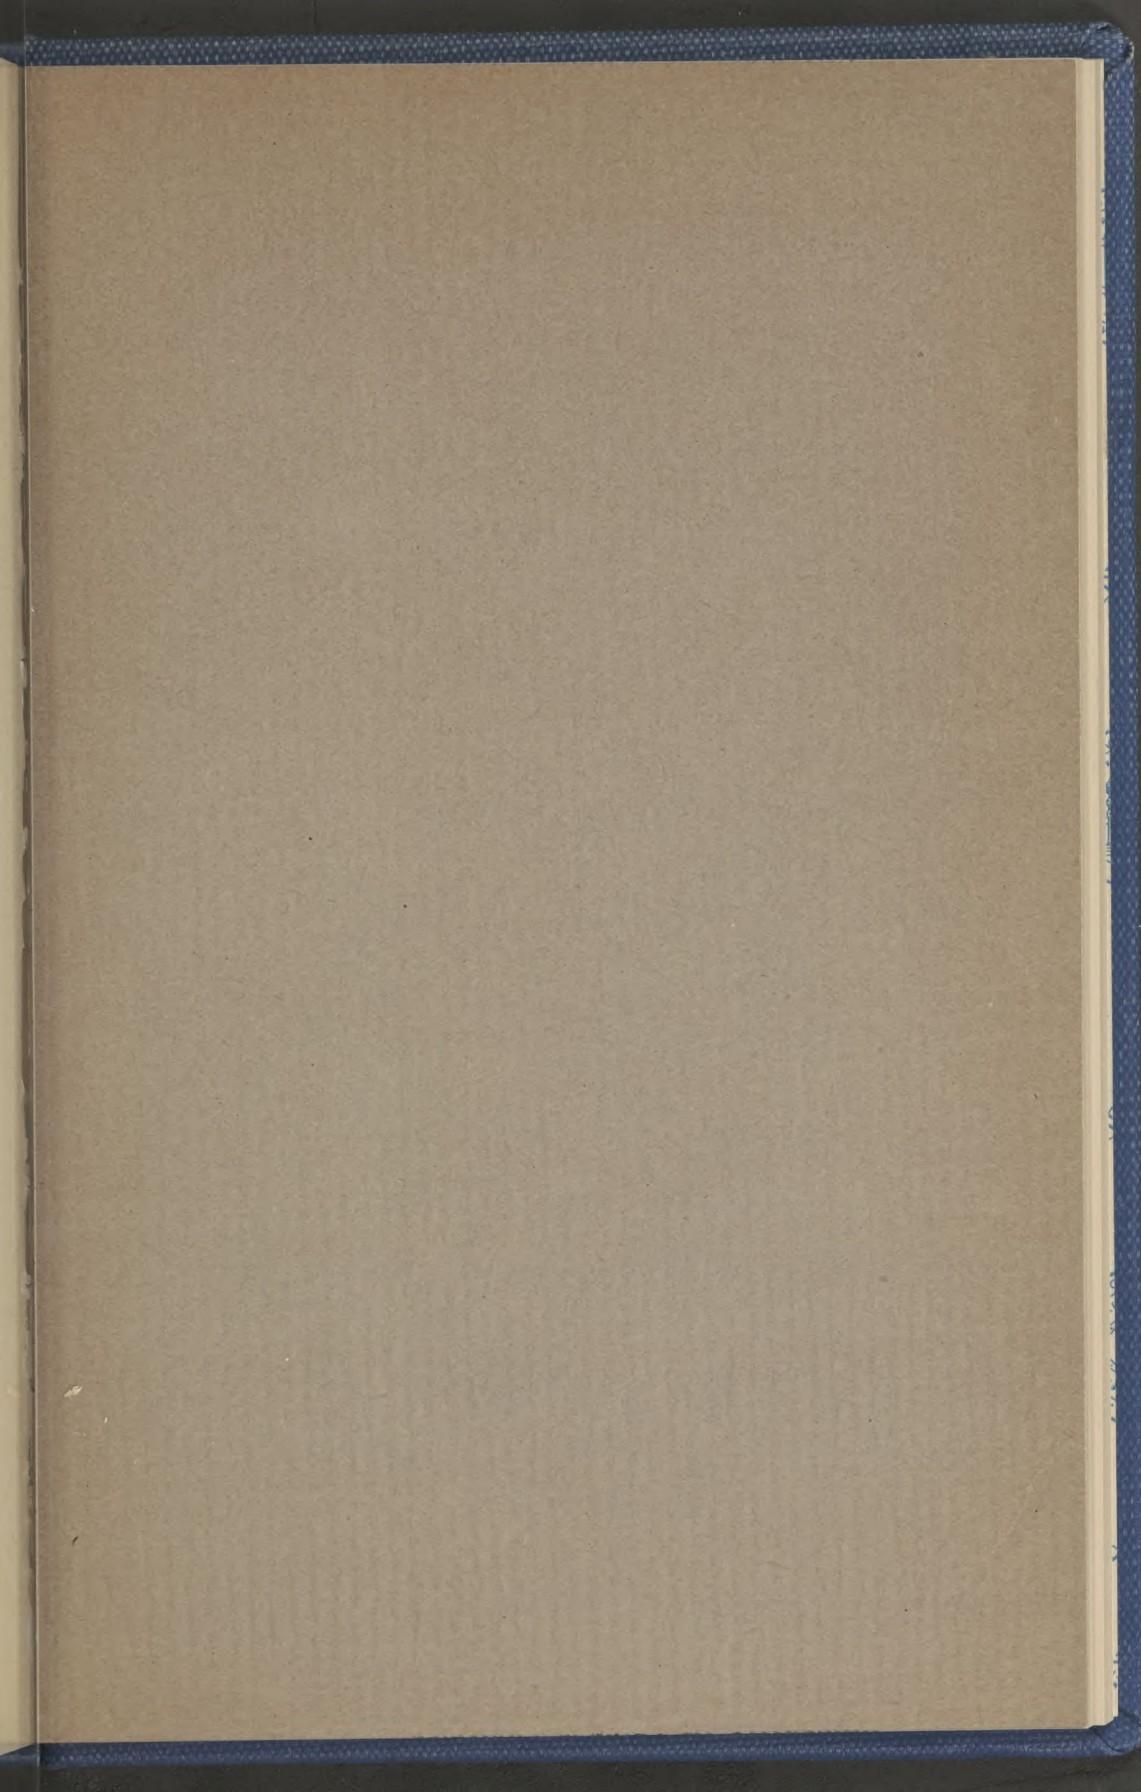

The music, under the efficient and faithful direction of Mrs. West, has been especially enjoyed.

May this Institution, under your wise direction, continue to be a blessing to suffering humanity.

Faithfully yours,

WILEY J. PAGE, *Chaplain*

Trustees' Report.

To His Excellency, Allen D. Candler, Governor of Georgia:

Dear Sir:

Complying with the provisions of the law of Georgia, the Board of Trustees of the Georgia State Sanitarium respectfully present this their report for the fiscal year ending September 1st, 1899, together with the reports of the various officers of the Sanitarium. The reports of these officials will show in detail the management of the Sanitarium for the year, and we invite your examination of them.

The Board of Trustees organized by electing a President, Vice-President, and Secretary, and the following Committees were appointed :

Executive Committee,

Auditing Committee,

Committee on Buildings, Machinery and Repairs,

Committee on Farm and Outside Business,

Committee on Dairy,

Sanitary Committee,

Committee on Rules and By-Laws.

The successful management of the Board is largely due to the faithful and untiring work of the various committees.

Under the rules, the Executive and Auditing Committees visit the Institution on the 20th of each month, and have the immediate control and oversight of the financial management in its remotest detail.

Your careful attention is especially called to the work of the Executive Committee. Most of the authority heretofore vested in the Superintendent and Steward of purchasing the supplies for support and maintenance, and the fixing of salaries of employees, now rests with this committee, who, together with the Superintendent and Steward, do this very important and responsible work.

It is proper here to state that while this work imposes

an arduous labor, and is quite a tax on the time and patience of the members of the committee, yet we feel assured that it is a move in the right direction.

We are gratified to report that, with the exception of measles, no contagious disease appeared among the inmates of the Sanitarium. See report of Supt. Powell.

During the year a large amount of grading has been done on various parts of the grounds, thereby beautifying them and preventing damage thereto by washing rains.

The buildings are in a thoroughly first-class condition. We have been compelled to expend a large sum of money to keep them in repair. Many of these structures are old and require expenditure of a large sum of money each year to keep them in good condition.

The interior of the buildings has been greatly improved by the laying of new floors, and the improvement of walls, etc., and needed furnishings have been added thereto. The institution presents a cleanly, attractive and homelike appearance, assuring the comfort of patients equal to that which they would have in the best homes of the State. In addition to the general care of the patients, infirmary wards have been established for the special care and treatment of the sick and feeble, where they can have the attention of nurses both day and night, and enjoy the additional advantage of being removed from the noise to which they would be subject to a greater or less degree in the general wards.

Connected with the institution is an operating room thoroughly lighted and heated and fully equipped with all appliances necessary for the performance of all modern surgical operations.

The medical care of the patients is given by the staff of physicians under the direction and supervision of Superintendent Powell, the value of which care is evidenced by the fact that the report of the Superintendent for this year shows that the recovery of acute cases reached the unusual figure of .447 $\frac{7}{100}$ per cent. This was a very decided advance over the previous two years, which were .395 $\frac{5}{100}$ and .39 per cent. respectively.

We would again emphasize the fact that the recovery of

insane patients bears a direct ratio to the duration of insanity before receiving hospital treatment, as shown by Superintendent Powell's report, which forms a part of this report.

Our citizens should know and act upon the well established fact that hope of cure of insanity is in direct ratio with the length of time insanity has existed in the individual. After a person has been insane one year the hope of restoring him to sanity is small.

The people of Georgia should send their insane relatives to the Sanitarium immediately after the fact is established that they are insane.

Recognizing the importance of careful and intelligent nursing of the insane, a training school for nurses has been established in connection with the Sanitarium, which is under the supervision of Miss Cross, as Superintendent of Training School. This school has been in successful operation for the past two years, and has greatly increased the faithfulness and efficiency of the nurses, and the scope of the school has been still further developed during the past twelve months.

The report of the Steward shows our per capita cost of maintenance of the institution for the fiscal year ending September 1st, 1899, of only \$117.00. As shown in Abstract N of this report, you will see that for each year for the past twenty six years the per capita cost has been more than that of the year just closed with only two exceptions, demonstrating the fact that your Board of Trustees have faithfully and efficiently discharged the duties of their office with every consideration of economy compatible with efficiency of service. Then, too, we cite you to the fact that the amount expended from the appropriation for maintenance for the year 1899 for permanent improvements was fully twice as large as in any one year of the institution. The nature and extent of these permanent improvements are fully set forth in the report of Engineer DeSaussure.

The growth of the institution necessitated the consumption of a large quantity of ice, and your Board, in the spirit of economy, erected an ice plant with the capacity of three tons daily, and have during this year constructed a large cold storage building wherein fresh meats, vegetables and other

supplies can be kept fresh and sound for consumption as needed. This cold storage building has a capacity of 9,124 cubic feet, and will result to the benefit of the institution financially, and insure the preservation of perishable articles of food, and thereby add to the comfort of the patients.

In our last report we stated that we expected to be able this year, by economical management, to install an electric plant for furnishing lights for the buildings and grounds. This expectation, however, was not founded upon an appropriation of \$275,000, and as this is the amount which was appropriated, it has been found impossible because of insufficiency of appropriation to erect an electric plant.

During the first part of the previous year, the dummy line had been delivering supplies from Milledgeville to the Sanitarium under a contract price of \$3,000 per annum, and upon the expiration of the contract demanded \$4,000 per annum for this service. The Board of Trustees refused this proposition, and referred the matter to the Executive Committee with power to act. Mules and wagons were purchased sufficient to deliver the supplies at the institution, and soon thereafter negotiations were entered into with the Central Railroad authorities to have them build a spur track from their main line to the Sanitarium storehouse. This was completed at or near the expiration of our last fiscal year. The Sanitarium has for the year 1899 enjoyed the benefit of free delivery of its supplies at its storehouse in consequence of the fact that both the Central and Georgia Railroads constructed tracks to our storehouse, and supplies are now purchased f. o. b. Sanitarium, instead of Milledgeville. By this change the institution saved \$3,000 last year, with the prospect of saving a like amount each year in the future. In addition to this each railroad company has constructed without cost to the State a coal chute at the terminus of its track, which greatly facilitates the handling of our coal.

The detailed reports of the Treasurer and Steward will fully acquaint you with the financial status of the Sanitarium, and we respectfully refer you to these reports for any desired information relative to appropriations and expenditures for maintenance.

By the reports of the Steward and Treasurer you will find that we have a surplus fund on hand amounting to \$8,819.73 at the end of our fiscal year.

We respectfully suggest that this surplus is a necessity in order to tide us over extraordinary expenditures during the fall and winter months, and but for this surplus we would be unable to meet our bills during such months. This surplus should not be considered as a part of the appropriation to be made for a subsequent year. Our surplus fund at the close of the fiscal year 1897 was \$8,543.15, and this year, as above shown, it is \$8,819.73.

We call your special attention to that portion of Superintendent Powell's report in reference to the overcrowded condition of the Sanitarium. This is a serious matter, and should engage the earnest, active efforts of the Board of Trustees, and of the Legislature of Georgia. The emergency is upon us, and must be met; and this can be done in only one of two ways. First, by enlarging the capacity of the Sanitarium by the erection of additional buildings; or second, for the trustees to discharge from the institution the harmless, incurable insane, as they are termed by an act of the Legislature, in order to make room for acute curable or dangerous cases. If this latter step is decided upon these unfortunate and helpless citizens of our commonwealth will be thrown as a charge upon the respective counties of the State, and in the vast majority of cases, be confined in the jails or poorhouses of such counties, as not one county in fifty in the State is prepared to give either skillful or humane care to this unfortunate and afflicted class. Your Board of Trustees, without committing itself to the request for an appropriation for an enlargement of the Sanitarium, respectfully request a conference with the Sanitarium Committee of the Legislature with a view to finding a solution of this question.

Your Board of Trustees are pleased to report that the corps of officials of the Sanitarium have been faithful and efficient in discharge of duty during the year just closed, and we take this opportunity to publicly acknowledge our indebtedness to these officials for valuable assistance in the successful management of the Sanitarium.

In closing this report your Board of Trustees feel that it is only just to themselves to state that in entering upon the discharge of their duties they were animated by the sole desire to faithfully and efficiently serve the State of Georgia, and her unfortunate insane. To this end they have bent their every energy so that their services would be beneficial to the insane, and a credit to the State; and while we would not seek to make an invidious comparison of the records of this Board of Trustees with previous ones, we feel justified in stating that the facts as set forth in the annual report of this Board will not suffer in comparison with any one of the previous Boards of Trustees who have with such credit and ability served the State.

We beg to tender to your Excellency and to the General Assembly our thanks for the generous maintenance of the Sanitarium for the year 1899.

Respectfully submitted,

E. E. DIXON, M. D., *President.*

Report of Superintendent Powell.

GEORGIA STATE SANITARIUM,
SEPTEMBER 1, 1899.

To the Honorable Board of Trustees,

Georgia State Sanitarium:

GENTLEMEN:—In conformity to the requirements of the law and rules of the institution I have the honor herewith to submit for your consideration the annual report of this institution beginning September 1st, 1898, and ending September 1st, 1899, together with the reports of Steward, Treasurer and other officers, giving a full and detailed account of its operations in all of its various departments; showing the amount of provisions, bedding, drugs; indeed, everything purchased, from whom, price paid, and aggregate cost. Also the movements of its population of both white and colored, with such suggestions as I deem advisable or beneficial in conducting the affairs of the institution.

On September 1st, 1898, there were white patients on hand 1,626, and colored 700, making a total of 2,326. There have been received since 502 whites and 323 colored, making a total reception of 825.

There have been discharged, removed, eloped and died during the year 711, leaving on hand September 1st, 1899, 2,440, of whom there are 48 whites and 1 colored on furlough, not discharged.

The average number of patients under treatment during the year was 2,383, while the total number receiving treatment was 3,151.

It will be seen that the average number receiving treatment was 136 more than last year. We have 114 more patients on hand than at the close of last year.

The following tables will give in detail the movement of both white and colored population:

STATEMENT—WHITE.

In relation to the number of white patients during the past year, or from September 1st, 1898, to September 1st, 1899,

There were patients on hand September 1st, 1898..... 1,626

White Male Lunatics..... 637

White Male Epileptics..... 99

White Male Idiots..... 38—774

White Female Lunatics..... 749

White Female Epileptics..... 70

White Female Idiots..... 33—852—1,626

There have been received during the year:

White Males..... 261

White Females..... 241 502

Total number of whites under treatment..... 2,128

Of whom there have been

Discharged restored..... 259

Discharged eloped..... 2

Discharged improved..... 2

Discharged removed..... 5

Discharged transferred..... 2

Discharged pregnant, (brought to the Institution in this condition)..... 3

Removed improved..... 1—274

There have died—Males..... 80

Females..... 76—156— 430

Leaving on hand September 1st, 1899..... 1,698

CLASSIFICATION OF THE WHITES.

White Male Lunatics..... 682

White Male Epileptics..... 99

White Male Idiots..... 42—823

White Female Lunatics..... 776

White Female Epileptics..... 64

White Female Idiots..... 35—875—1,698

Of the white males there have died from epilepsy 13, heart disease 3, old age 6, exhaustion 14, paralysis 10, diarrhoea 3, marasmus 2, influenza 2, exhaustive mania 6, consumption 6, tuberculosis of bowels 2, convulsions 1, erysipelas 1, chronic exhaustion 2, apoplexy 2, exhaustion from malignant cause 1, syphilis 1, pneumonia 1, fall from tree 1, strangulated hernia 1, chronic mania 1, yellow softening of brain 1. Total 80.

Of the white females, exhaustion 7, acute enteritis 1, nervous exhaustion 23, old age 1, continued fever 1, apoplexy 4, epilepsy 13, dropsy of heart 1, organic brain disease 1, paralysis 2, senile exhaustion 6, pneumonia 1, marasmus 1, consumption 5, cancer 1, brain exhaustion 1, dysentery 2, exhaustive mania 2, heart disease 1, enteritis 1, and tuberculosis of bowels 1. Total 76.

STATEMENT—COLORED.

In relation to the number of colored patients during the past year, or from September 1st, 1898, to September 1st, 1899,

There were patients on hand September 1st, 1898.....	700
Colored Male Lunatics	300
Colored Male Epileptics.....	38
Colored Male Idiots.....	7—345
Colored Female Lunatics.....	333
Colored Female Epileptics.....	19
Colored Female Idiots.....	3—355— 700

There have been received during the year:

Colored Males.....	166
Colored Females.....	157
Total number of colored under treatment.....	323

Of whom there have been

Discharged restored	94
Discharged eloped.....	1—95
There have died, Colored Males.....	91
Colored Females	95—186— 281
Leaving on hand September 1st, 1899.....	742

CLASSIFICATION OF THE COLORED.

Colored Male Lunatics.....	304
Colored Male Epileptics.....	70
Colored Male Idiots	2—376
Colored Female Lunatics.....	342
Colored Female Epileptics.....	22
Colored Female Idiots.....	2—366— 742

Of the colored males who have died, there were from old age 10, epilepsy 9, consumption 19, dropsy 4, marasmus 8, exhaustive mania 10, senile exhaustion 2, heart disease 5, syphilis 2, unknown 4, apoplexy 5, paralysis 4, paresis 2, pulmonary hemorrhage 1, organic heart disease 2, asthenia 1, pulmonary tuberculosis 2, and chronic nephritis 1. Total 91.

Of the colored females, hepatic cirrhosis 1, epileptic asthenia 10, tuberculosis 6, chronic enteritis 10, exhaustion 3, cerebral apoplexy 3, exhaustive mania 12, apoplexy 7, pulmonary tuberculosis 7, tubercular enteritis 1, marasmus 5, senile exhaustion 7, organic brain disease 2, organic heart disease 5, general miliary tuberculosis 1, acute enteritis 3, acute nephritis 1, septic peritonitis 1, capillary bronchitis 1, syphilitic exhaustion 1, chronic tubercular pneumonia 1, chronic tubercular infection 1, chronic nephritis 1, terminal dementia 1, acute septicaemia 1, asthenia 1, carcinoma mania 1, and tubercular pneumonia 1. Total 95.

Terminal History.

HEALTH.

The general health of the Institution has been as good as could be expected under the circumstances. Of the 825 patients received during the year there were a large number completely broken down physically and mentally, and many lived but a short time after their reception—some only a day or so.

We had an epidemic of measles which passed through many wards of the Institution, and with that exception we have been exempt from all epidemic or communicable disease, save consumption. There is a decrease in that in the colored department where it has been so fatal, especially with the females. The report of the Pathologist will show that there has been within the past two years a decided decrease in the mortality from tuberculosis. I can only attribute the decrease to the prompt efforts to isolate all cases, and a prompt and thorough examination of all suspects.

By reference to the mortality tables you will see the cause of death of those who have died during the year. The ratio of deaths to the number treated during the year is larger than last year, being $.10\frac{85}{100}$ per cent. This, however, is due to the large number of cases that were brought to the Institution almost in a dying condition, living but a short while after reception. The causes of death will show that very few died of curable diseases.

I have to report one death which I think was suicide. While out in the yard Mr. Walter Messau climbed a tree before

the attendant could stop him. He either jumped or fell, and died in a few hours.

RECOVERIES.

The percentage of recoveries is calculated or based on the number received or admitted during the year. The per cent. this year is $.447\frac{1}{2}/100$ —a little above that of last year. This is simply due to the fact that we received a few more acute and curable cases this year. It should be remembered that the recovery from insanity bears almost a direct ratio to its duration. While there are a few unexpected recoveries of long standing, the per cent. in such cases is so small we are not justified in encouraging hopes of a full and complete recovery. The first aim and object in the treatment of the insane should be to remove them from home and the surroundings under which their insanity occurred. Insanity should have early treatment. It is a fatal mistake with many relatives and friends in keeping the insane at home until all hope of recovery has vanished. They are then brought to the Institution for custodial care during life.

JAMES T. HOBBY.

It is with deep sorrow and regret that I have to report the death of Mr. James T. Hobby, one of our most faithful and efficient employees, who died on the 12th of May, 1899, of apoplexy. He had been in the service of the Institution since 1860, and during all that time he took a lively, active interest in everything pertaining to its welfare. In his death the Institution has sustained a heavy loss. His inflexible integrity and fidelity to duty makes his loss felt by all.

SUGGESTIONS.

When we take into consideration the fact that we are receiving from one to twelve applications daily for admissions—an average of about six a day—you will readily see that the Institution will soon be filled to its utmost capacity, and indeed overcrowded. Judging the future by the past, I apprehend that a majority of the applicants are chronic and incurable, and are to be cared for by the Institution during life. There seems to be a tendency on the part of the authorities of some of the counties to get clear of every case that is in any way a care or expense to the county or family. A

majority of the patients received this year were chronic and incurable; many were old and feeble, and some had to be carried to the wards on cots or in rolling chairs. The reception of such cases now will perhaps be to the exclusion of some acute and curable case, defeating the aim and object of the Sanitarium in giving the acute the benefit of the earliest possible hospital treatment, a good per cent. of which would be restored to health, family and society, and become productive powers of the State instead of a burden to it for life. The Institution was not intended as a refuge for poverty and decrepitude.

I would suggest that some protection be thrown around the Institution so as to give those that are amenable to treatment the earliest possible benefit of hospital treatment. To meet the constantly increasing demands for admissions, there must be some provision made in the near future for increased accommodation, or some of the harmless and incurable returned to their respective counties.

While I am not unmindful of the financial condition of our State, I believe all of the indigent afflicted are wards of the State, and should have State care as far as possible, but those that need it most, and can be benefited by it, should have it first.

There are certain classes received in this Institution that should have separate provision made for their care. The epileptic should be colonized; the feeble-minded or idiots should be placed in schools; the defective and depraved should be in a reformatory, and there should be a small hospital in connection with the prison farm for the convict insane. To mix these classes is a positive injury to each. Some of the States have separate provision for them, and I hope our State before a great while may see her way clear financially to take such a humanitarian position. As I have said in a former report, before our Sanitarium can be regarded as firmly established on a scientific basis, these classes must be separated from the insane proper.

PATHOLOGICAL DEPARTMENT.

You will see by the work done in the laboratory the importance of scientific investigation of the maladies of the insane. There has not been as much work done in this de-

partment this year as desirable on account of the resignation of our Pathologist. There have been many important advances made by those who have the care and treatment of the insane in the last decade, but, in my judgment, none is of such importance as the pathological laboratory for the investigation of the maladies of the central nervous system. I am firmly of the opinion that time, labor and money cannot be better spent than in the scientific investigation of the nervous system. All the alienists are looking to the laboratory work of the neuropathologist for the possibilities of to-morrow. There is no other source to which they would be justified to look for light and guidance. Post-mortem investigation reveals facts; ante-mortem investigation is often shrouded in darkness and doubt.

We have been without a neuropathologist for about a year, and I feel that it would be a step backwards not to supply the vacancy caused by the resignation of Dr. Oertel. If we expect to keep our Institution abreast with others, and the advances that are being made in psychiatry, then it is necessary to have a neuropathologist, and I trust your Honorable Board will see your way clear to select one at this meeting. My apology for the earnest manner in which this matter has been presented must be my desire that our Institution should be equal to any in the land in advances and in scientific work.

LABORATORY WORK.

The work in this department for the year just ended has been very much curtailed in consequence of the resignation of the regular Pathologist, which took place last October. We very much regret this fact, for our work was getting well under way, and we are warranted in believing that this field of labor offers to the alienist the greatest hopes for definite knowledge in the causation of insanity and localization of lesions.

We have performed about twenty (20) autopsies during the year, but have made no microscopic investigation into any of our findings; the gross lesions only being noted, and records made of the same. These necropsies have been mainly confined to epileptics, with the hopes of ascertaining what per cent. of gross lesions we might find in this condi-

tion. In nearly every case we have found existing a gross morbid change sufficient to excite convulsions.

While many of our post-mortems have thus given evidence of microscopic brain lesions, and lesions of other organs that might account for the mental condition existing—yet, in many we have found no visible organic change, either in brain or other viscera.

To this latter class we hope, through scientific work of the neuropathologist, to make much advancement in our knowledge of psychiatry.

Definite results have already been claimed from research upon the blood; and there may still be many unobserved factors which tend to a condition of mental derangement.

As shown in our previous reports, the exhaustive study upon the kidneys has disclosed pathological conditions of great significance. And it may not be improbable that the frequent morbid character of these organs, in diseases of the brain, bears a causal relation to certain forms of mental aberration. Suffice it to say, that we do not consider this work has been in vain, or given entirely negative results. If nothing more has been accomplished, we have established the fact that the kidneys are often diseased in the different forms of insanity much more frequently than with the sane.

More positive and encouraging have been our deductions, through post-mortem investigation, in diseases of the lungs. The frequent occurrence of phthisis pulmonalis and general miliary tuberculosis in mental diseases gives us just grounds for suspecting a causal relation existing between them. Indeed, we have met with many cases that presented a picture of exhaustion or marasmus when the necropsy disclosed a condition of general miliary tuberculosis. Notable is the fact, that in a given family pulmonary tuberculosis and insanity often go hand in hand for several generations.

We recall one very interesting case of general miliary tuberculosis in which the splenic parynchima was almost entirely destroyed by tubercular areas—there being also infection of the liver and peritonaeum.

With us, I am sure, the diagnosis upon these cases has been frequently erroneous—our cases of chronic asthenia, no doubt, often depending upon a tubercular infection.

In the complete destruction of such blood-making tissues as the spleen there must surely be some effect upon the blood, and its function in supplying our general economy with nutrition and oxygen. It is here that the scientific work of the pathologist will be much demanded, and the microscope will be indispensable to the elucidation of these hidden problems.

We hardly deem it necessary to call attention to the positive demand of the microscope in the examination of sputum. Though its usefulness in this respect has been generally acknowledged, we would feel that we had not done our duty should we fail here again to emphasize its great need.

Tuberculosis is now generally admitted to be an infectious disease. Some countries have thrown around it the same restraints as around any other contagious or infectious malady. Isolation is being practiced, and hygienic precautions being enforced with marked rigidity.

The microscope offers to us the only positive means of early diagnosis in consumption, and we have found its aid of inestimable value in the prompt detection and isolation of such cases in our thickly crowded wards.

The greatest work, perhaps, of the neuropathologist will be upon the nervous system. In those cases where we detect no visible morbid changes about the brain or spinal cord we hope, through the assistance of the microscope, to reach some conclusions as to those cytolitic lesions which must necessarily take place somewhere among the nerve cells.

How important then must be the necessity of maintaining this scientific division of our work, and how untiring should be our efforts in promoting this line of study.

TRAINING SCHOOL AND INFIRMARY WARDS.

Training schools and infirmary wards are not only important adjuncts, but are indispensable to a well-equipped hospital for the insane. For several months of the year lectures were suspended on account of an epidemic of measles in the Institution. All gatherings were stopped to prevent a spread of the disease. Our faithful and efficient Superintendent of Nurses, Miss Cross, takes a lively interest in the training school. The clinical advantages of the nurses this year have, perhaps, been better, and they have received more bedside instructions than usual.

A large, commodious lecture-room in the basement of the Center Building has been fitted up and furnished. It is not only a lecture-room, but will be used also for practical training, and the preparation of gauze and other surgical necessities, which are made by the nurses.

There has been no material change made in the infirmary wards during the year. The sick and feeble should be moved from the disturbed wards to infirmary wards where they will have quiet, and be under the care of skilled nurses day and night.

SURGERY.

Our good results in major surgery among the insane has fully justified the establishment of this department.

As shown in our last report, our operating room is well equipped, and it is truly gratifying to be able to report that this branch of our work has been perfectly satisfactory and encouraging. From the mental improvement of some of the cases operated upon, we are fully convinced of the usefulness of this treatment in many conditions of insanity.

The object of this department is not to cut at random, or do surgery where we do not feel it will be positively beneficial.

Our patients are first subjected to a thorough physical examination. States of the genital organs are often disclosed which seem to have some influence upon the mental disease present. It is in these cases of apparent relationship between mind and physical condition that we consider for operation.

How frequently we encounter large fibromata involving the uterus, with symptoms of depression and melancholia, dependent, no doubt, upon the dragging pain and weight accompanying this condition.

As shown in our last report, we have done for this trouble several hysterectomies. Two of the patients were sent home six or eight months ago apparently well, and they have not yet returned. We, therefore, feel justified in believing that the removal of this weight and source of worry in these cases is wholly responsible for the subsequent mental improvement. We do not hesitate to advocate surgical treatment in these cases—with complete hysterectomy whenever the uterus is so impaired. Of course, we should not operate if the patient

is in such a state of mental excitement as would make the operation inadvisable.

We cannot deny, either, the efficiency of ovariotomy in those cases of reflex excitability so directly traceable to the catemenia. All of our cases of this nature have been greatly benefitted, both mentally and physically, by the removal of the ovaries. In fact, this is the only treatment we have to offer in conditions of hystero-epilepsy, and we hope to relieve many of this class.

We do not exaggerate when we make this prophesy, for we constantly come in contact with patients who exhibit mental aberration only at their menstrual time. These patients are apparently well during the first of the month, but upon the appearance of the catemenia they are subject to slight convulsions, mental dullness, and often go into a cataleptic state lasting, with slight intermissions, often during the whole time of the menstrual flow. We have observed upon several occasions patients to have distinct convulsions upon making a bimanual examination. The exciting cause in these cases is too unmistakable to leave us without hope in these operations.

We report three case of double ovariotomy, in which we have had one complete cure, one very much benefitted, and one not apparently improved.

Our data as yet is very small—consequently we can come to no positive conclusion as to the good and rationality of such procedure. But we feel that in the statistical evidence which we hope to obtain in the future we can prove the advisability and justice of our course.

But little progress has been made in brain surgery among the insane, but it is a question as to whether there is much to be accomplished in this direction.

Many of our post-mortems show old depressed fractures, fibromata of the dura, and other pathological conditions subject to surgical alleviation. But we find it well-nigh impossible to detect these morbid processes from the meagre history which we are able to obtain. Some, we doubt, should we detect them, could not be relieved on account of their chronic nature.

In conditions of recent critical apoplexy there would

appear to be some hope of relief from the trephine, but seldom, among the insane, is the cranium invaded for hemorrhages of this nature.

We trust, however, that it will not long be so, and we may yet be upheld and justified in opening the skull for cortical lesions of this character.

The following tabulations will indicate the number of laparotomies performed during the last eighteen months—within this table there being incorporated the hysterectomies and ovariotomies as given in the report of last year, in order to show the mental termination of each:

SEX.	MENTAL AND PHYSICAL DISEASE.	SURGICAL TREATMENT.	TERMINATION.	
			PHYSICAL.	MENTAL.
Female.	Chronic Mania. Fibroid Uterus.	Hysterectomy.	Recovery.	Not im- proved.
Female.	Acute Mania. Fibroid Uterus.	Hysterectomy.	Recovery.	*Recovery
Female.	Hystero-Epilepsy. Ovaritis.	Ovariotomy.	Recovery.	Recovery.
Female.	Epileptic Insanity. Ovaritis.	Hysterectomy.	Recovery.	Not im- proved.
Female.	Hystero-Epilepsy. Retro-Versio-Uteri. (Adhesions.)	Hysterectomy.	Recovery.	Recovery.
Female.	Hystero-Epilepsy. Cystic Ovaries. (Adhesions.)	Ovariotomy.	Recovery.	Very much im- proved.
Female.	Chronic Mania. Prolapsus Uteri.	Ventro-Fixation.	Unfavor- able.	Not im- proved.
Female.	Acute Mania. Ovaritis. (Adhesions.)	Ovariotomy.	Recovery.	Not im- proved.

*By recovery here we mean sent home and not returned.

EMPLOYMENT AND AMUSEMENTS.

In all cases where the physical and mental condition will justify it we encourage our patients to engage in some employment. From long experience we have found that nothing

is more potent in its influence in diverting the mind from morbid ideas into normal channels; hence, the great importance of outdoor exercises and employment. It has been our constant effort to find congenial employment for as many as possible. By their assistance in this way our per capita cost in maintaining the Institution is very much reduced, and the per cent. of recoveries is very much increased; but under no circumstances whatever is any one forced to work—it is entirely optional with them.

Many of the white females are employed in the sewing-rooms, and the men in the gardens and various other departments of the Institution. The colored females are generally employed in the laundries, and the colored males in grading, and in the fields, dairies, etc.

The amusements have been kept up during the year as usual, under the supervision of Dr. J. M. Whitaker, First Assistant Physician, except while we had an epidemic of measles.

IMPROVEMENTS AND REPAIRS.

There have been many important and permanent improvements made during the year of a substantial character, and some completed that were commenced last year. Your Board justly and wisely considered it great economy to provide an ice plant and cold storage for the Institution so as to manufacture all ice that is needed by the Institution, and cold storage so as to keep perishable articles for an indefinite length of time. This building for refrigeration is 77 feet 6 inches long and 34 feet 2 inches wide, and contains a room for brine tank and four refrigerating chambers aggregating 9,124 cubic feet. The two meat rooms are provided with overhead tracks and traveling hooks.

Another important improvement is the erection of a warehouse and apothecary department. This building is 74 feet 6 inches long and 40 feet wide, and is two stories high. The first floor contains two rooms 15 x 17 feet, one room 30 x 38 feet, and one room 24 x 38 feet. The second floor contains twelve rooms 12 x 15 feet. The upper story will be used as sleeping apartments for attendants, and will accommodate from twelve to fifteen, thereby making room for twelve or fifteen patients on the wards. In our crowded condition we

need all the available space possible on the wards for the patients. These improvements were urgent demands of the Institution.

There have been many other important repairs and improvements made during the year. This large property requires constant work to keep it in repair, and we should not lose sight of the fact that insanity means destruction—a perversion of the natural mode of thinking and acting—and that the tendency of quite a large number of our patients, at times, is to destroy furniture, crockery, bedding, clothing, lights, sash, and even tearing their rooms to pieces. These things should be taken into account when we consider the repairs and supplies of a hospital for the insane. Hence, you see that a hospital for the insane cannot be compared with any other hospital.

For a full and detailed account of all improvements and repairs I refer you to the Engineer's report.

FINANCES.

By reference to the report of our faithful Steward, you will see that the per capita per diem for the year just past is 32- $\frac{5}{100}$. His report also contains a classified statement of expenditures and everything purchased, from whom, price paid, and aggregate cost, and the balance on hand with our Treasurer.

ASSISTANT STEWARD.

You will see by reference to the report of the Assistant Steward the results of the gardens and dairies, and also the amount of pork raised, which was 48,038 pounds. The results in these departments are very satisfactory, especially the garden, when we take into account the continued drouth during the summer.

STOREKEEPER.

The Storekeeper's report will give a detailed account of the management of that department.

MATRON.

The report of our faithful Matron will give a full and complete account of the work done in her department.

APOTHECARY.

You will see from the report of the Apothecary the amount of drugs purchased, and the number of prescriptions filled, and the amount of drugs on hand.

LIBRARIAN.

I am deeply grateful for the generous contributions from the various friends of the Institution throughout the State for books, periodicals, etc., donated to the Institution for the pleasure and welfare of our patients.

By reference to the Librarian's report you will see a list of these donations, and the contributors so far as it has been possible to ascertain.

RELIGIOUS SERVICES.

Religious services have been conducted regularly during the year on Thursday and Sunday afternoons, except during the epidemic of measles, by our faithful Chaplain, Rev. W. R. Branham. The attendance upon the services has been large, and the conduct good. The Chaplain has responded to all calls to bury the dead.

CONCLUSION.

It gives me great pleasure to state that the officers, attendants and employees generally have discharged their respective trying duties faithfully and efficiently. And to your honorable Board I am deeply grateful for all the aid and co-operation that you have given me in the discharge of my onerous and responsible duties.

Trusting to the guidance of a wise and merciful Providence, I am,

Very respectfully,

T. O. POWELL,

Superintendent.

Report of Treasurer.

GEORGIA STATE SANITARIUM,
MILLEDGEVILLE, GA., Sept. 14, 1899.

Dr. T. O. Powell, Superintendent.

DEAR SIR:—Herewith please find my report for the fiscal year commencing September 1st, 1898, and ending August 31st, 1899.

Very truly, etc.,

M. A. McCRAW, *Treasurer.*

M. A. McCraw, Treasurer,

In account with the Georgia State Sanitarium.

Report of Steward.

GEORGIA STATE SANITARIUM,
Milledgeville, Ga., August 31st, 1899.

DR. T. O. POWELL, *Superintendent*:

DEAR SIR.—I have the honor to hand you herewith my report as Steward, from September 1st, 1998, to September 1st, 1899.

Abstract "A" shows the balance brought forward from the last fiscal year, the amount drawn from the State Treasurer for support and maintenance of the Institution, together with a classified statement of the disbursements, also the balance on hand to be carried forward to the next year.

Abstract "B" shows Salaries paid to officers.

Abstract "C" shows Wages paid to employees.

Abstract "D" gives in detail the expenditures on account of Subsistence.

Abstract "E" gives in detail the expenditures on account of Incidental Expenses.

Abstract "F" gives in detail the expenditures on account of Clothing.

Abstract "G" gives in detail the expenditures on account of Fuel and Transportation.

Abstract "H" gives in detail the expenditures on account of Medical Supplies.

Abstract "I" gives in detail the expenditures on account of Contingencies.

Abstract "J" gives in detail the expenditures on account of Stationery and Postage.

Abstract "K" gives in detail the expenditures on account of Special Appropriation for Fire Walls and Cistern.

Abstract "L" gives in detail the expenditures on account of repairing Building for Colored Insane together with the balance on hand carried forward to next year.

Abstract "M" shows the requisitions for support and maintenance of the Institution, drawn from the State Treasurer, in their regular order.

Abstract "N" shows the average number of patients from 1873 to 1899, both included, together with the per capita cost per diem and per annum.

Abstract "O" shows the cost of maintaining one patient for one year, month, week and day.

Our "per capita" is \$117.00 per annum—thirty-two cents and five mills for one day.

By reference to the report of Mr. G. W. Hollinshead, Assistant Steward, you will find detailed results from garden, dairies, hogs, etc., also a report of stock, wagons, utensils and implements on hand.

Our Storekeeper, Mr. W. H. Hunter, reports stock on hand \$8,277.98.

Our Apothecary, Dr. A. G. North, reports stock on hand \$969.36.

Thanking you for the many courtesies and acts of kindness shown me, I am,

Very respectfully,

C. H. TROUTMAN,
Steward.

ABSTRACT "A."

Statement of Steward, Georgia State Sanitarium, giving the balance brought forward from last fiscal year, and all money received; also classified statement of disbursements from September 1st, 1898, to September 1st, 1899.

Report of Assistant Steward.

GEORGIA STATE SANITARIUM,
Near Milledgeville, Ga., Sept. 1st, 1899.

Mr. C. H. Troutman, Steward:

DEAR SIR : I herewith hand you my report as Assistant Steward for the year beginning September 1st, 1898, and ending with August 31st, 1899, of the old and new Dairies, Garden and Pork and Transportation. Also statement of Stock, Wagons, etc., on hand September 1st, 1899. Our fall crops are not so forward as we have had them on account of the hot, dry weather, except potatoes and peas, which are looking fine.

We have since our last report lost by lightning striking our mule shed seven head of mules, five of which were killed instantly and two died from the effects soon after. We have also lost during the year fourteen head of cattle, eight of which were milch cows, from an unknown disease. Also twenty-one head of hogs and shoats, twelve of which were stoien and nine died from speying.

Our Dairies this year show more plainly the mistake we have made in not breeding the cows regularly up to last fall.

Very Respectfully,

GEO. W. HOLLINSHEAD,
Assistant Steward.

Report of Matron.

GEORGIA STATE SANITARIUM,
September 1st, 1899.

Dr. T. O. Powell, Superintendent :

Permit me to submit the enclosed as my report for the year ending September 1st, 1899. I would add that repairing has been done for the Institution, and all scraps and remnants have been put to a good use and have been properly accounted for through the storekeeper's office. All of which is respectfully submitted.

MRS. J. M. DARNELL, *Matron.*

Report of Engineer.

GEORGIA STATE SANITARIUM,
Milledgeville, September 1, 1899.

Dr. T. O. Powell, Superintendent:

DEAR SIR: I have the honor to submit herewith my annual report of the workings of this department from September 1st, 1898, to September 1st, 1899.

Respectfully,
T. H. DESAUXURE, *Engineer.*

IMPROVEMENTS.

Very extensive repairs have been done on Wards 1, 2, 3, 7, 8, 9, 10, 11, 12 and 13 for white females; the plastering has been thoroughly repaired, all of the wood work has been repaired, the old paint scraped off and repainted two coats. On the Infirmary all the whitewash has been taken off the walls, down to the original "hard finish," and the entire ward given two coats of water paint—the wood work being given a coat of white enamel and the floors a coat of floor varnish. New flooring has been put in on Wards 7, 10, 11 and 12, female, and ninety-five (95) rooms have been refloored. All flooring used has been selected rift or quarter-sawed pine of the best quality. Three new sets of outside steps have been put to the above wards.

In addition to the above mentioned painting the ornamental steel ceiling of the Amusement Hall has been painted and decorated, and the walls and wood work painted in harmony. The walls, ceiling and wood work of the entire first floor of the Center Building have been painted. Also, eight hundred and thirty-seven squares of tin roof.

PORCH AT DETACHED BUILDING.

A porch, extending to both stories, has been built at the East Detached Building. The porch is 18x26 feet, and has

the front and sides made of wire cloth of open mesh, making two large and comfortable open air rooms. A wooden pavilion, 18x30 feet, has been built in exercise yard for boys, and a substantial fence put around the yard.

TELEPHONES.

Five instruments have been added to the Telephone Exchange during the year, and a handsome railing of twisted iron scroll work on a wooden base has been put around the switch board.

PLUMBING.

Four water-closets have been put into officers' cottages, and four water-closets and bath tubs at Negro Building.

STEAM HEATING.

Twelve steam radiators have been put in Center Building. All of the $2\frac{1}{2}$ - and 3-inch return pipe originally laid in the ground at Negro Building has been renewed, and the new pipe is laid inside of 6-inch terra cotta pipe. There has also been placed at Negro Building an automatic feed pump and receiver, for returning the water of condensation from many of the radiators that are too low to return their water by gravity to the boilers.

NURSE'S LECTURE ROOM.

Two large rooms have been fitted up in the basement of the center building for lecture rooms for nurses.

GRADING.

During the year much grading and sodding has been done in beautifying the grounds. The plot in front of the new building has been much improved by terracing and sodding, and a drive way has been made through the abandoned dummy cut. There has also been much done in front and to the side of the main building and in both negro building yards. In the recreating yards of the negro building sewers and surface drains have been run to carry off the rain water heretofore so troublesome in washing. In the rear of the new building a space has been excavated for a coal yard.

LAUNDRY.

The Negro Building laundry has been enlarged by a brick annex 87x32 feet. Both the new and old part have

been paved with hand pressed tile. Two additional kettles for boiling clothes and a steam dry-room of thirty racks were put in.

Besides a large amount of ordinary repair about the building, the carpenters have made the following articles:

- | | | | |
|-----|-------------------------------------|----|----------------------------|
| 8 | Window frames. | 2 | Six-arm ironing tables. |
| 3 | Open-air water-closets. | 1 | Blueprint printing frame. |
| 125 | Feet of boxing for pipes. | 1 | Medicine case, 12x7 feet. |
| 5 | Lattice stands for laundry. | 1 | Clothes chest. |
| 22 | Sash. | 1 | Book case. |
| 4 | Hominy paddles. | 3 | Tank stands. |
| 20 | Lattice benches. | 3 | Awnings. |
| 1 | Railing around telephone. | 3 | Large safes. |
| 14 | Sets of inside blinds, hinged. | 1 | Sky-light. |
| 1 | Flight stairs. | 4 | Taps for flushing tanks. |
| 2 | Swings. | 1 | Case for wrenches. |
| 15 | Step-ladders. | 5 | Double door frames. |
| 15 | Lattice doors. | 7 | Single door frames. |
| 1 | Platform at storehouse, 110x12 ft. | 1 | Clothes press. |
| 8 | Shuck rubs | 36 | Sets of shelving. |
| 2 | Sets of shelving for fittings. | 29 | Dining tables. |
| 17 | Battened doors. | 3 | Long ladders. |
| 26 | Panel doors. | 17 | Comimodes. |
| 25 | Hoe handles. | 17 | Squares of shingling. |
| 12 | Baker's paddles. | 6 | Clothes racks. |
| 51 | Panels of picket fence. | 1 | Well curb. |
| 86 | Panels of close fence, 10 ft. high. | 3 | Tool boxes. |
| 19 | Wire guards. | 17 | Singletrees. |
| 350 | Bedsteads. | 2 | Bolsters. |
| 2 | Plow beams. | 1 | Wagon tongue. |
| 2 | Wagon frames. | 1 | Frame for shrinking tires. |
| 14 | Spokes. | 8 | Doubletrees. |
| 328 | Coffins. | 30 | Hopper tops. |
| 51 | Boxes for coffins. | 12 | Voucher boxes. |
| 2 | Pair crutches. | 2 | Sets of steps. |

T. H. DE SAUSSURE, C. E.

Report of Apothecary

SEPTEMBER 1st, 1899.

To Dr. T. O. Powell, Superintendent:

DEAR SIR: Below you will please find my report of Apothecary department for the year commencing September 1st, 1898, ending September 1st, 1899:

Amount of drugs purchased from September 1st, 1898 to 1899	\$ 3,919 77
Amount of drugs sold officers and employees from September 1st, 1898, to September 1st, 1899, which deductions were made from checks for which the Apothecary is entitled to credit	\$ 212 55
Amount of drugs on hand September 1st, 1899	\$ 969 36
Number of prescriptions filled from September 1st, 1898, to September 1st, 1899	15,973

Very respectfully,

A. G. NORTH, *Apothecary.*

Report of Librarian.

GEORGIA STATE SANITARIUM,
September 1st, 1899.

- Several copies Sunday School Times, Mr. J. F. Simmons.
- 1 box Periodicals and Papers, Mr. P. J. Cline.

Respectfully, ROBT. A. TRIPPE, *Librarian.*

Report of Chaplain.

GEORGIA STATE SANITARIUM,
Milledgeville, Ga., Sept. 18, 1899.

Dr. T. O. Powell, Superintendent:

DEAR SIR: I have the honor to report, as Chaplain of the Georgia State Sanitarium, that regular religious services have been conducted on Thursday and Sunday afternoons during the year, and all the duties of the Chaplaincy have been faithfully discharged.

The religious services have been marked by the most perfect interest and attention on the part of those present, and we have good reason to believe that they have been very helpful.

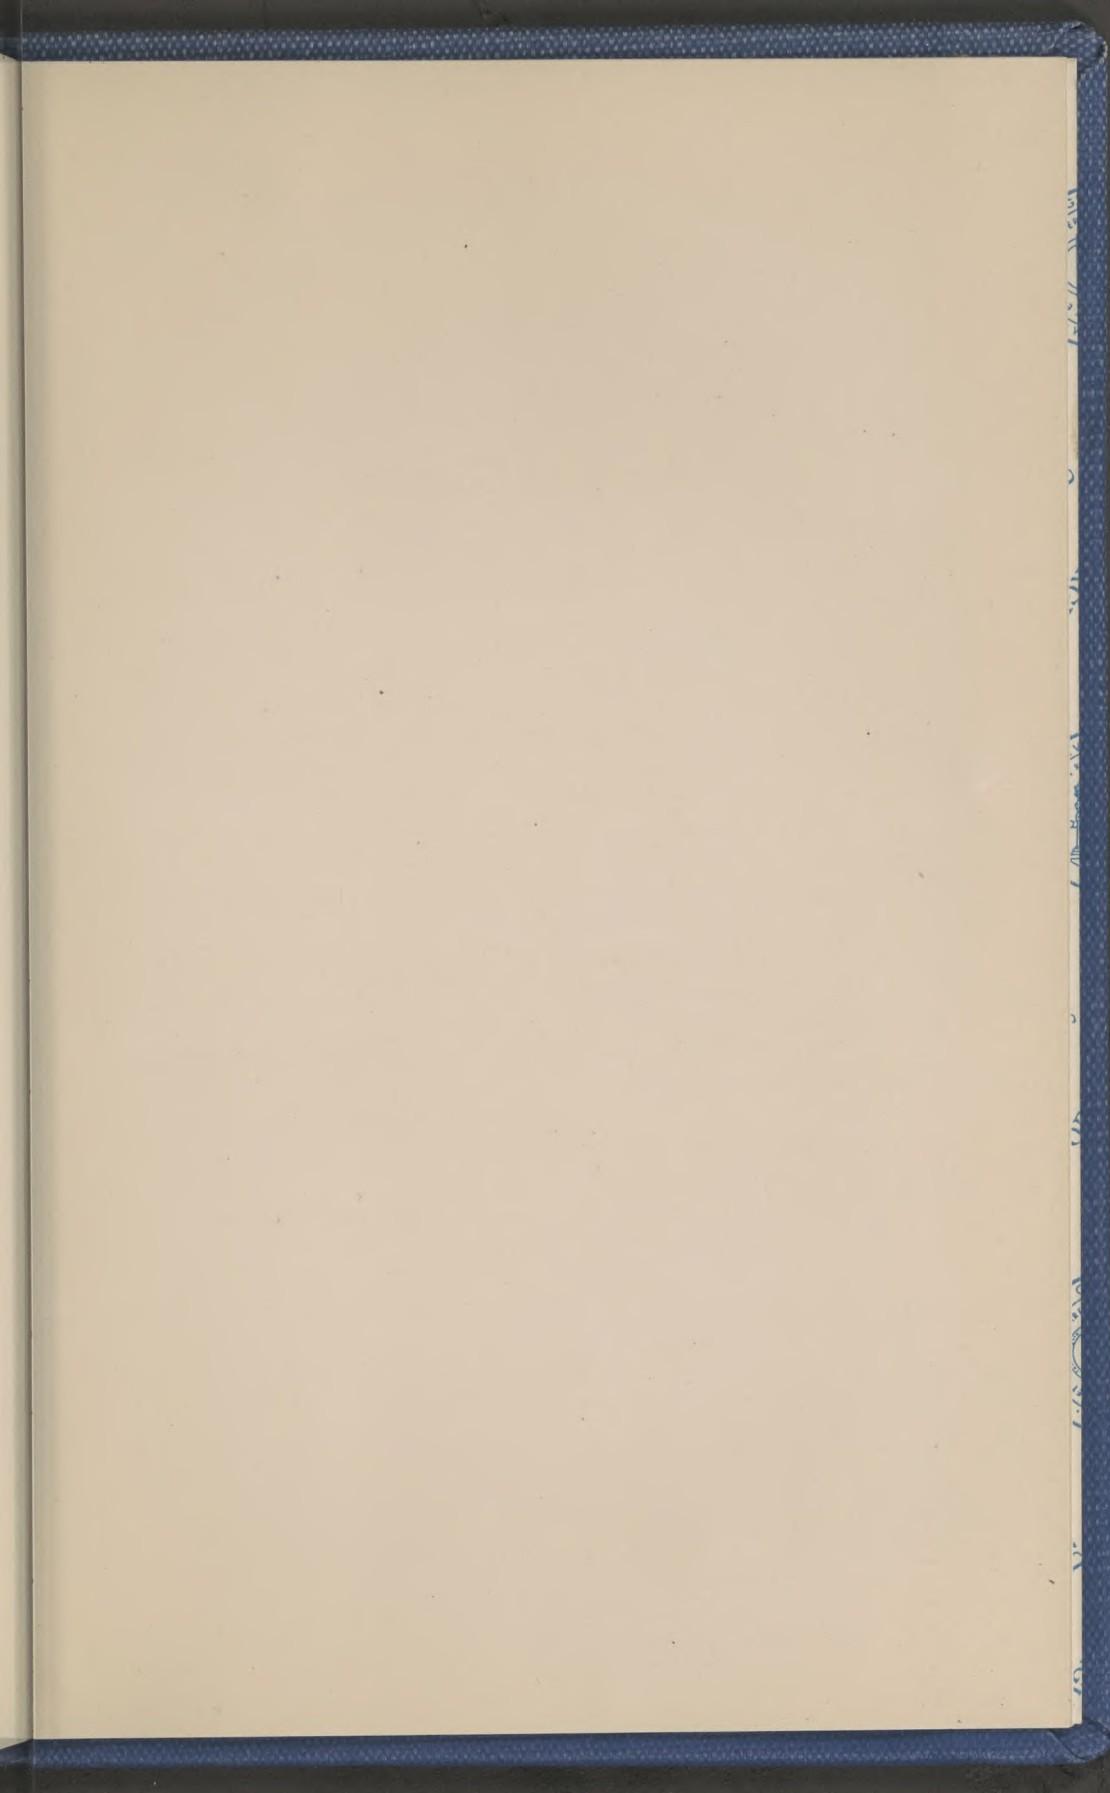

One of the most enjoyable features of these services has been the music, under the direction of Mrs. Julia West, assisted by a competent choir.

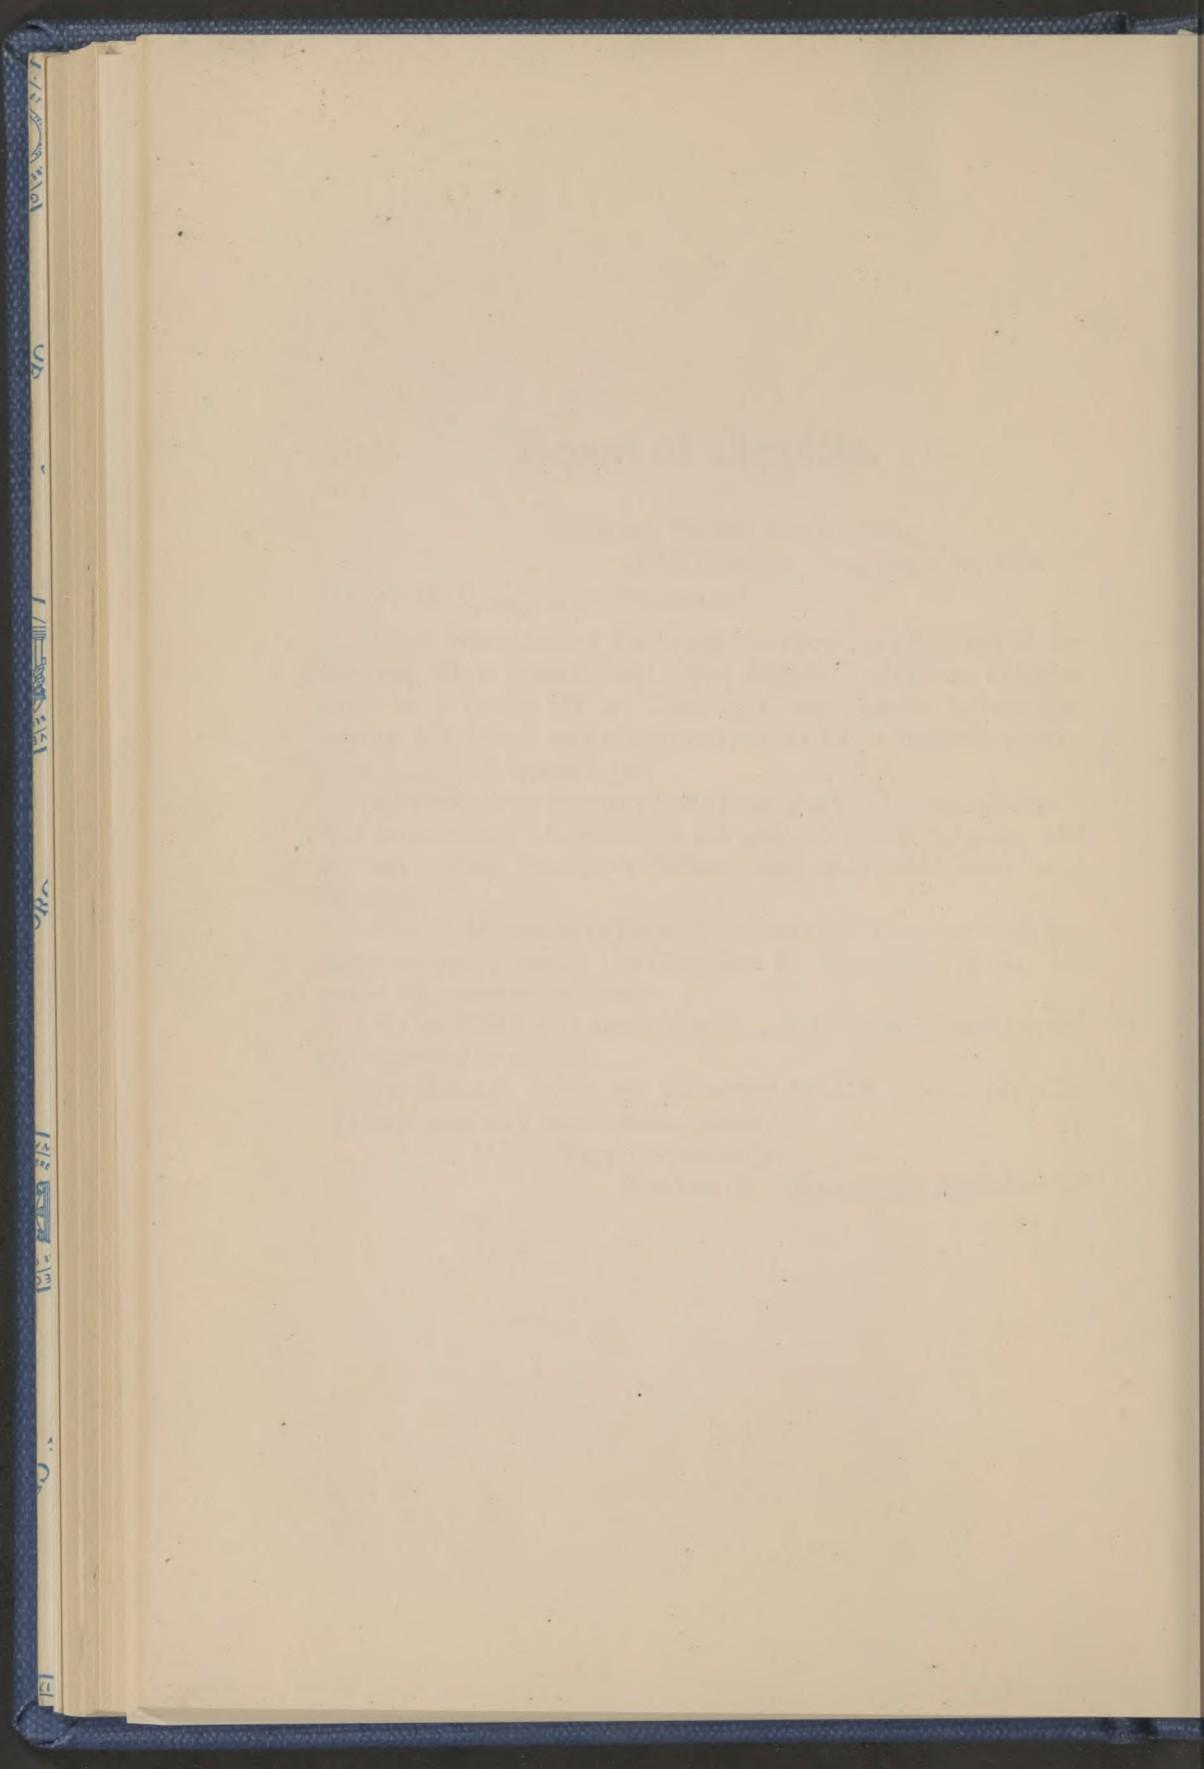

My ministry has been a real joy to myself, and I trust not fruitless to others.

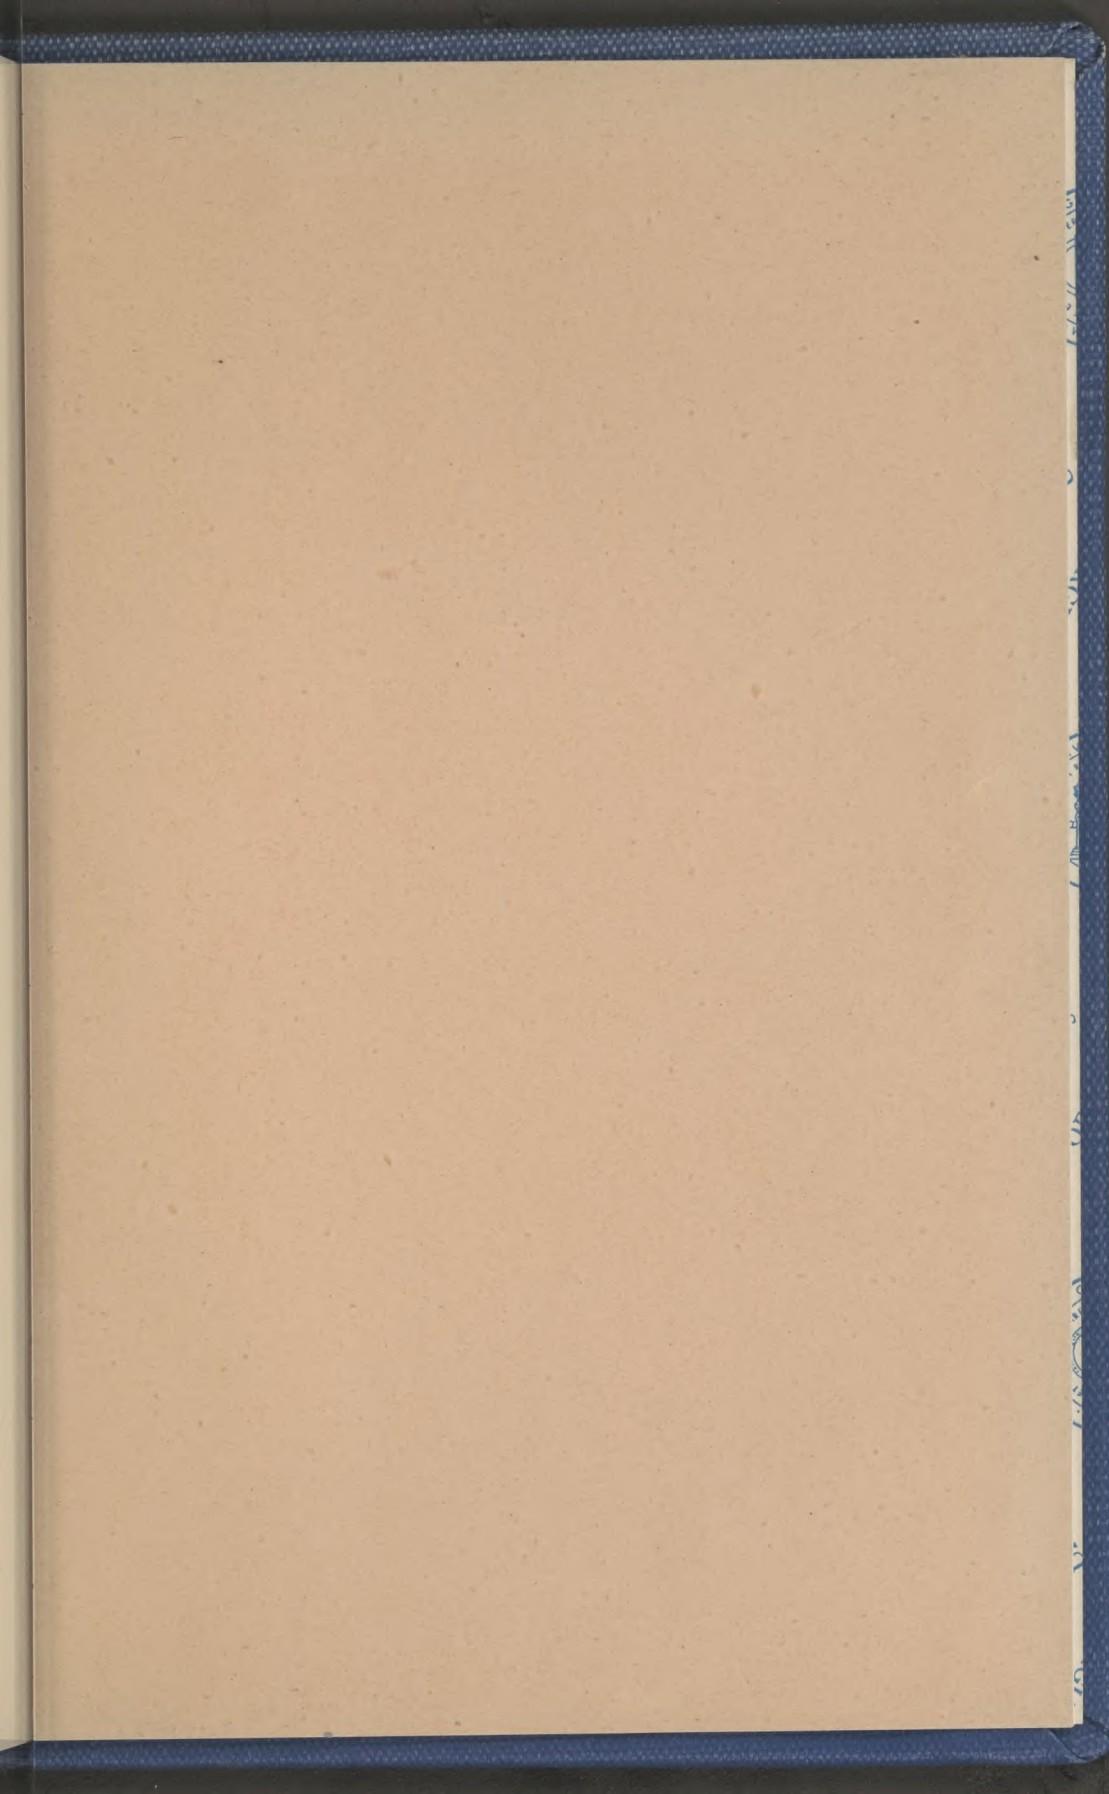

In closing, allow me to return thanks to you for your uniform courtesy and consideration.

Very respectfully,

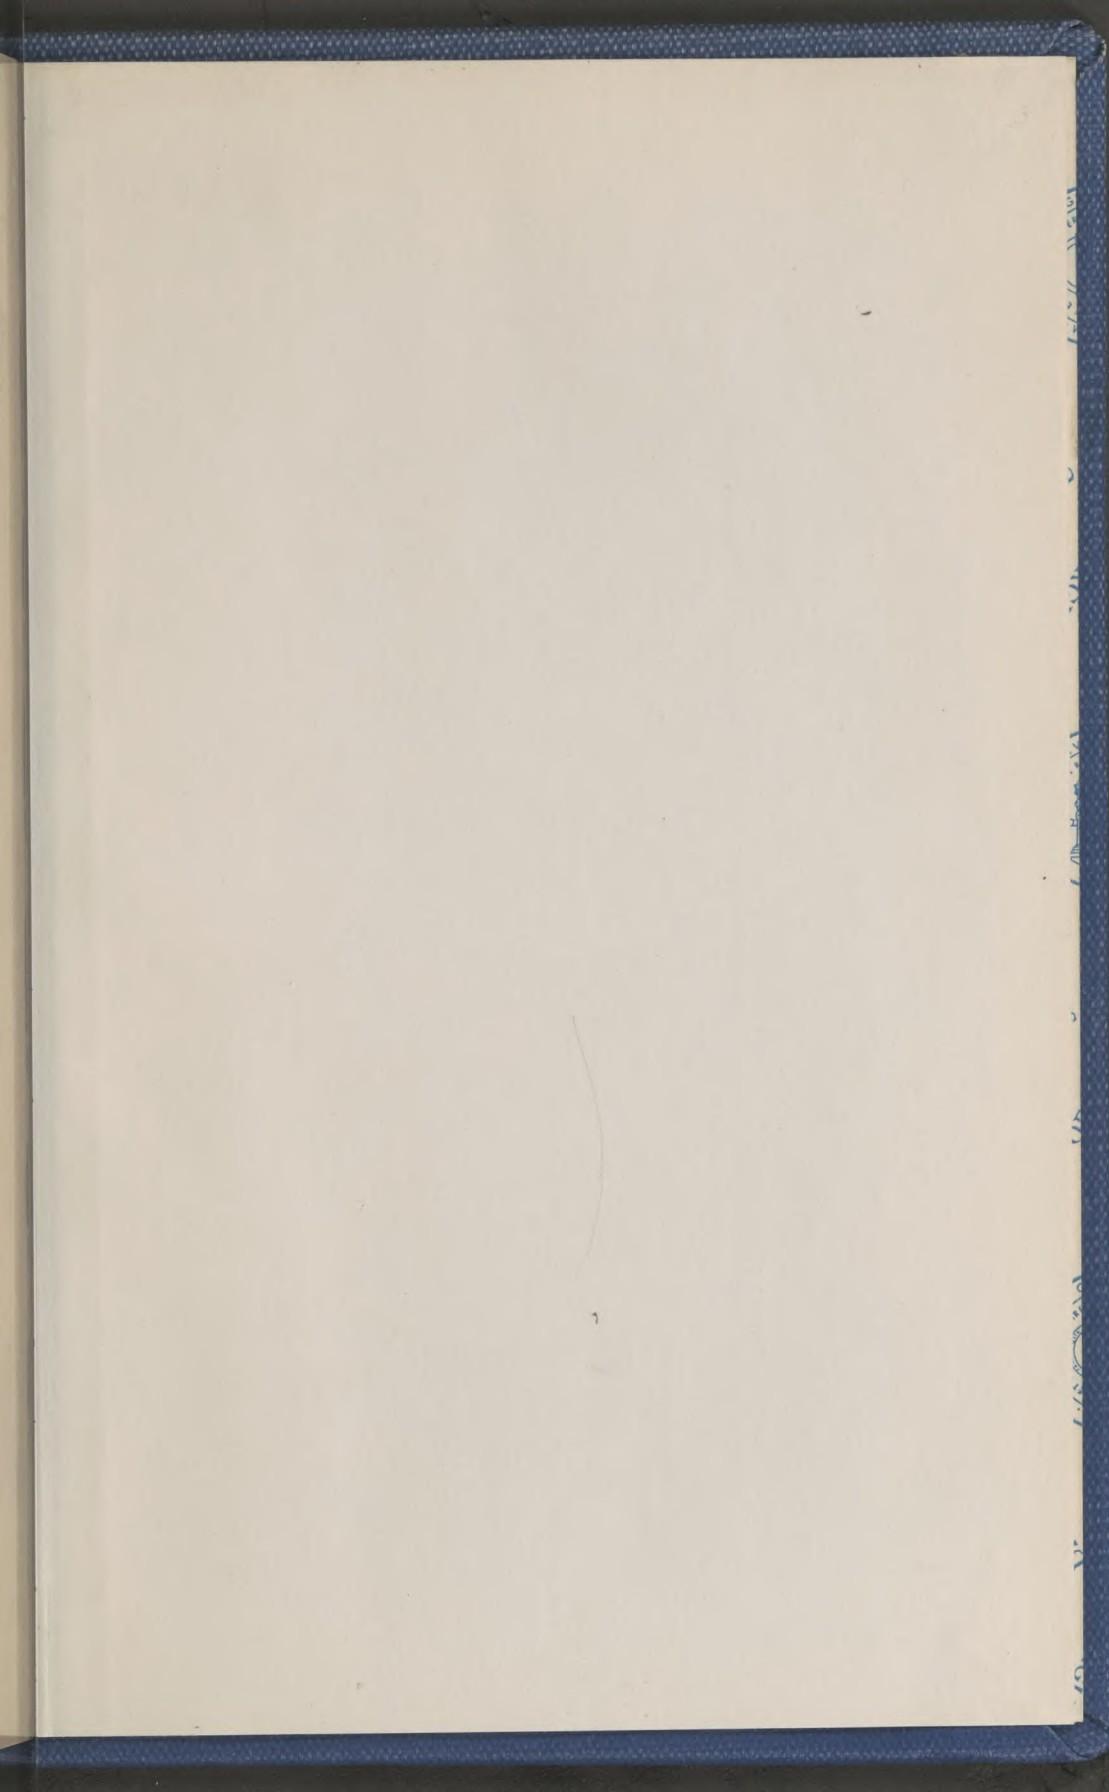

WALTER R. BRANHAM, *Chaplain.*
